Sui Southern Gas SSGC | Company Limited

## Landmark deal: Pakistan, Iran sign \$7.5 billion gas pipeline project

The Official Magazine of Sui Southern Gas Company

Pakistan and Iran finalized US \$ 7.5 billion gas project, dubbed as a "peace pipeline" to start supply of natural gas from 2014. The agreement was signed in Tehran on June 13, 2010, by Iran's deputy oil minister Javad Ouji Pakistani and

delegation including Kamran Lashari, Secretary, Ministry of Petroleum and Natural Resources and Naim Sharafat, MD, Inter-State Gas Systems (ISGS).

"Now the project has entered into implementation phase and there are no further formalities left in wav". Mr. Sharafat

He said the IP project was another testimony of the long, historic and cordial relations between Pakistan and Iran. The pipeline will connect Iran's giant South Fars gas field with

Balochistan and Sindh provinces.

Pakistan will construct about 700-km pipeline from the border, traversing along the Makran Coastal Highway to connect with its existing gas transmission network at Nawabshah. A 42-inch diameter pipeline is planned to be laid, which is estimated to cost US \$ 1.65 billion.

The project is crucial for Pakistan to avert a growing energy crisis, already causing severe electricity shortages in the country. It will help generate around 5,000 megawatts of electricity. Under the Gas Sale and Purchase Agreement (GSPA),

Pakistan will import about 750 million cubic feet a day (mmcfd) with a provision to increase it to one billion cubic feet a day (bcfd). The volume of imported gas will be around 20% of Pakistan's current gas production and the agreement is for a period of 25 years, renewable for another 5 years.

#### Sovereign Guarantee Agreement

In May this year, officials from the two countries signed Sovereign Guarantee Agreement in Islamabad. As part of Conditions Precedent (CPs) to be

completed by parties to make the GSPA effective, the Government of Pakistan is providing 'Performance Guarantee' on behalf of ISGC. The agreement was signed by Mr. S. R. Kasaezadeh, Managing Director, National Iranian Oil Company on behalf of Iran and Mr. Irshad Kaleemi, Joint Secretary, Ministry of Petroleum and Natural Resources on behalf of the Government of Pakistan. Minister for P & NR, Mr. Naveed Qamar, Secretary Petroleum and Natural Resources, Mr. Kamran Lashari, Mr. Naim Sharafat, MD, ISGS and Mr. Mobin Saulat, CFO, ISGS were also present on the occasion.

#### Editor's Note

#### No Magic Wand!

Financially speaking, the month of June has a reputation of being a frenzied one. Books are being closed, statements are reconciled and all monetary aspects are taken care of with a keen eye on the balance sheet. It has been a taxing six months, more so since UFG is one pressing issue that remained the focus of attention of all divisions and departments. There is no magic wand to bring UFG numbers to acceptable levels. But the pace has been set and we are all saddled up for a tough yet challenging ride.

It has been an eventful month for several reasons, locally and internationally and this issue of The Flame has comprehensively covered them. The much delayed Pakistan-Iran gas pipeline deal was signed, heralding a new era of development. Across the Atlantic, the Gulf of Mexico oil spill, an environmental disaster of epic proportions, is giving a very tough time to the Obama Administration. On the other hand, the US, with its big gas shale resources, has surpassed Russia as the world's leading gas producer. On the other hand, our recent MoU contracts with the CSR partners are a manifestation of the fact that corporate philanthropy is alive and active at SSGC. Read these stories and more in this issue.

Ed

#### Gas arrives in Kandiaro

Syed Zafar Ali Shah, MNA, Pakistan Peoples Party inaugurated the supply of gas at village Soomar Khan Channer, Taluka, Kandiaro in District Noshero Feroze on June 1, 2010.

Shabbir Ahmed Magsi, Regional Manager (Nawabshah Region) and his team organized the inauguration ceremony. Mr. Magsi welcomed the guests and apprised them of gas distribution schemes of SSGC in Sindh.

Also present on the occasion were Syed Ahmed Ali Shah, MPA, PPP, Araz Muhammad Larik, Zonal Manager (NR) and Sher Bahauddin Shah Jilani, Manager, Distribution (NR).

#### The Iran-Pakistan (IP) Gas Pipeline - Project Details

The Iran-Pakistan (IP) Gas Pipeline is designed to carry 1.05 bcfd natural gas from Iran's South Pars gas field in the Persian Gulf to Pakistan. The pipeline will start at Assaluyeh in Iran, and traverse a distance of 1,150 km up to the Iran-Pakistan border, which will be built and operated by Iran. Pakistan will build the pipeline from the Iran-Pakistan border up to its high pressure gas transmission network at Nawabshah, having a distance of nearly 781 km. In pursuance of the Federal Cabinet decision taken on June 3, 2009 the counterparties i.e. Inter-State Gas Systems (ISGS) from Pakistan and National Iranian Gas Company (NIOC) from Iran signed the Gas Sale and Purchase Agreement (GSPA) on June 5, 2009. Earlier Presidents of both the countries signed the Inter Governmental Framework Declaration on May 24, 2009.

#### **Current Status**

The IP GSPA stipulates certain Conditions Precedents (CPs) to be completed by GSPA Parties to make the GSPA effective. As part of the process of CPs completion, ISGS has obtained all required corporate and governmental approvals.

GoP Performance Guarantee on behalf of ISGS has been executed on May 28, 2010 between the GSPA Parties. With all the CPs completed, GSPA Parties have agreed to sign the Effective Date Confirmation Letter by June 10, 2010 for the effectiveness of the GSPA.

#### **Project Capital Cost**

The original capital cost estimates of the Project were provided by Pricewater HouseCoopers (PwC) in their pre-feasibility study of 2007, which have subsequently been updated from time to time, to reflect current market prices of steel and other major inputs. As per current estimates, the capital cost of the Project with 42inch diameter pipeline comes to about US \$ 1,245 million. These estimates will however be firmed up on the completion of Feasibility Study and FEED, and will be locked in after tendering for the procurement of materials and equipment and appointment of construction contractors. A year-wise indicative schedule of project cost is depicted in the Table on page 04.

Project Financing-Public/Private Partnership The project is planned to be financed on public/private basis, under which the initial development expenditures will be incurred from public sector partnership funding, followed by private sector investment at the later stage of the project. The ISGS will remain a public sector organization fully owned by the GoP and GoP controlled entities.

#### Proposed Debt/Equity Ratio

The Project is planned to be funded, as approved by the Steering Committee/Sub-Committee of ECC, at a debt-equity ratio of 70:30 requiring an equity investment of US \$ 375 million and debt financing of US \$ 870 million. PSEs equity investment @ 40% to be channeled through ISGS comes to US \$ 150 million.

The local and international private investors many of whom have already shown keen interest in the project will provide 40% of the total equity i.e. US \$ 150 million while the balance equity i.e. 20% US \$ 75 million will be raised through IPO.

Exhibit: IP Gas Pipeline Project - Pipeline Route Map

(Figures in USD)

The Project's debt portion of US \$ 870 million is expected to be secured from a combination of domestic and international financiers including ECAs, International Financial Institutions (IFIs), banks and other long-term non-bank financial institutions. ECA's financing will mainly cover the cost of HR coil and compressors. Expatriate Pakistanis may be targeted to participate in sukuk bonds.

Engineering and Project Management As per the planned project implementation strategy, Engineering and Project Management in the development stage of the project includes:

- Route Reconnaissance
- Detailed Route Survey (DRS)
- Bankable Feasibility Study
- Social and Environmental Impact Assessment (SEIA)
- Front End Engineering Design (FEED)

The construction stage (overall project management) shall cover:

- Procurement support of Long Lead Items
- Post FEED Engineering
- Tendering and Selection of EPC/Construction Contractors
- Construction supervision
- Commissioning and assistance in operation

#### Project Economics/Benefits

The imported Iranian gas will be used exclusively to furl existing and future power generation, and will support over 5,000 MW power generation capacity, which will help in overcoming the power shortage crisis.

The construction of pipeline will also create job opportunities, vocational training and health facilities in backward areas of Balochistan and Sindh. Natural gas fuel will ensure substantial carbon credits being an environmental friendly fuel.

A detailed analysis was undertaken to evaluate the economics of importing Iranian gas, with alternative fuels (HSFO and LNG) for power generation.

It was concluded that imported natural gas is the cheapest and most efficient fuel for power generation, which will result in significant annual saving when compared with the alternative fuels (HSFO, LNG, Coal etc.).

Project Timeline According to the Project Implementation Schedule the first gas flow is targeted by end 2014.

#### Management-World Bank mission holds vital meeting

The Government of Pakistan has asked World Bank (Energy Mission) to help the country's power and gas utilities to improve their infrastructure and utilization efficiency. SSGC has prepared a 5-year comprehensive proposal for the Bank's consumption with the ultimate aim of bringing UFG to acceptable levels. The plan focuses on rehabilitation of pipelines and improvement of cathodic protection as well as improvement of automatic pressure management measurement system. The World Bank support has been solicited to accelerate the implementation of the UFG programme.

In this regard, an important meeting was held between the Company management and World Bank mission on June 22, 2010 at the SSGC Head Office. The World Bank delegation comprised Robert M. Lesnick, Group Advisor and Javed Hussain, consultant and other development specialists.

Dr. Faizullah Abbasi, MD, SSGC shared with the World Bank delegation the findings of the underground and overground average UFG volume per km and per customer in selected areas of Sindh and Balochistan. Salim A. Mughal, SGM (Distribution) also pointed out that more than 40 zones have been created to conduct exercises in pressure profiling to check leakages which are a major contributing factor in decline in UFG. Robert M. Lesnick, Group Advisor,

Word Bank noted that it was clear that a methodology exists whereby the Company was looking for specific leakages numbers to justify investment for rehabilitation.

The management appraised the delegation about the Company's rehabilitation efforts while underscoring the point that UFG is a core issue the Company is combating in a scientific and prioritized manner. The MD added that the major portion of the CAPEX too is being allocated to bring UFG and other component tasks including cathodic protection, overhead

rectification and pressure measurement system to acceptable levels and the impetus of World Bank is important in this regard.

Apart from the MD, Azim Iqbal Siddiqui, DMD (C&FS), Syed Hassan Nawab, DMD (O & P), Rahat Kamal Siddiqui, SGM (ES), Salim A. Mughal, SGM (D), Shahid H. Jafri, CFO, Shoaib Warsi, GM (O)-D, Pervaiz Bhatti, GM (UFG), Shabbir Ratlamwala, GM-D, Mir Shahid Ali, GM (Treasury), Prince Naushad, ACE (R&D) and Aatir Salman, DCE (R&D), also attended the meeting.

#### Distribution

# SSGC lays down major supply mains to cater to Karachi's key industrial areas

SSGC's Karachi Distribution Department laid 16" and 24" dia high pressure gas supply main in Karachi. To meet the increasing gas demand of Landhi Industrial Area and industries located on National Highway, Karachi Distribution laid 6.6-km of 16" dia supply main through a very congested and difficult terrain of Malir River. A significant feature of this feat is that the project was carried out concurrently with the Company's normal gas expansion under Annual Development Program.

The pipeline was commissioned on June 21, 2010. The Company's Distribution Department worked in tandem with the Projects and Construction (P&C) Department to complete the project on a fast track basis. In future, this pipeline will also be utilized to facilitate customers up to Ghaggar Phatak.

By channelizing its own resources, Karachi Distribution is, at present, also engaged in the construction of 24" dia and 16" dia supply main of National Industrial Park. This pipeline will also cater to the need of other industries located on Korangi Creek Road besides covering large residential and commercial loads. The pipeline is expected to be completed within one month.

Karachi Distribution is moving ahead with revamping its network to meet the rising gas demand with an eye on the future load.

## MD gives promotion letters to new GMs

Dr. Faizullah Abbasi, MD, SSGC presented promotion letters to the recently escalated fourteen General Managers in a ceremony held at the Head Office in June 2010. Azim Iqbal Siddiqui, DMD (C&FS), Syed Hassan Nawab, DMD (O&P) and Zuhair Siddiqui, SGM (MS) were also present on the occasion.

Following GMs were given promotion letters:

- a) Shakeel Bukhari (Measurement)
- b) Sultan Rasheed (CP)
- c) Dr. Ejaz Ahmed (HSE)
- d) Abdul Majid Malik (HR)
- e) Pervez Bhatti (UFG)
- Mushtaq Siddiqui (Distribution, Sindh)
- g) Shabbir Ratlamwala (Rehabilitation)

- h) Tariq Hussain (S&M)
- Amiruddin Siddiqui (P&C)
- Fayyaz Merchant (Sales)
- k) Amir Mumtaz Khan (Admin. Services)
- I) Mushtaq Bhutto (Recovery)
- m) Nehal Ahsan (Stores)
- n) Mir Shahid Ali (Treasury)

## US surpasses Russia as world's leading gas producer

The US, with its big gas shale resources, has surpassed Russia as the world's leading gas producer, according to the US Department of Energy's Energy Information Administration. EIA said US gas production for 2009

probably rose 3.7% to 22.04 tcf. or 60.4 bcfd. i t s hiahest level of t h e decade. Russia's output fell12% to 20.55 tcf, or 56.3 bcfd, last year, the Russian energy ministry said this week.

The US growth trend may indicate that Gazprom will not be able to break into the US market as it had planned, Mikhail Korchemkin, head of the consulting firm East European Gas Analysis, said in a Bloomberg report. Gazprom had set a target to take as much as 10% of the US market by 2020 through LNG sales from Arctic plays, according to a company executive.

In the US, by contrast, lower gas prices last year than in 2008 encouraged the power sector to absorb the booming output from newly developed gas shale deposits. The surprising boost that shale gas has given US output has closed the world's biggest energy consumer to some imports and "created a

huge oversupply of LNG in Europe," Korchemkin said. Russia, which has the world's largest reserves and a quarter of Europe's market, led the world in output from 1986 to 1996 and again in 1999. Despite the decline in output, Moscow signed deals with China last year for \$ 25 billion of

loans to help with oil and gas development, and also started

exporting
LNG last year from
Sakhalin Island, off its
Pacific Coast, mainly to
Japan and South Korea.

#### SSGC and Petronas negotiate GSPA

SSGC and Petronas Carigali, a leading Malaysian Oil and Gas Company held negotiations on June 17, 2010 on the Gas Sales and Purchase Agreement (GSPA), for gas from the newly-discovered Mehar Field. Petronas Carigali Pakistan Limited recently made a commercial discovery of gas from the Mehar Gas Field (Mehar Block) in District Dadu, Sindh.

The total estimated gas reserves of the

field are 246 bcf, which will produce gas for eighteen years. In the first phase (3 years) around 30 mmcfd gas would be supplied by Petronas whereas in the second phase around 75 mmcfd gas would be produced.

The Government of Pakistan through the Ministry of Petroleum and Natural Resources has allocated Mehar Gas to SSGC (50% of which will be shared with SNGPL). Delivery of the gas is expected

in the third quarter of 2011.

The Mehar Gas will be injected into SSGC's Transmission System at SMS Thari Muhabat (IRBP system), through a 16-inch diameter, 67 kilometer long high pressure pipeline. The estimated cost of the pipeline is Rs.1.5 billion.

#### Agreements signed with leading social organizations

#### MoUs inked as part of CSR initiatives

SSGC focuses on grass-roots and tertiary level education in the marginalized communities of Sindh and Balochistan by making significant investments for appreciable socio-economic benefits.

This was stated by Dr. Faizullah Abbasi, MD, SSGC on the occasion of the signing of the MoUs with representatives of Marie Adelaide Leprosy Centre (MALC), WWF-Pakistan, Indus Resource Centre (IRC) and The Citizens Foundation (TCF) as part of the Company's Corporate Social Responsibility (CSR) initiatives in the area of education, health and environment. Divisional Head Zuhair Siddiqui, SGM (MS), and Nasreen Hussain, DGM (CCD) were also present on stage to witness the signing.

The MD reiterated that the Company will continue to fund those NGOs and social organizations that give a huge importance to empowering and mainstreaming the under-privileged communities of Sindh and Balochistan which also happen to be SSGC's franchise areas for transmission and distribution of natural gas. Dr. Faizullah said that he was proud to work with collaborative partners such as MALC which has single-handedly worked towards controlling leprosy in Pakistan by 100%.

Earlier, the MD inked the MoUs with Sadiqa Salahuddin, Executive Director, IRC, Shakeel Ahmed, CEO, MALC, Asad Ayub Ahmed, CEO, TCF and Dr. Ghulam Akbar, Director, WWF-Pakistan.

Under the MoU signed with MALC, as part of its initiative in the area of healthcare, SSGC will continue to provide financial support for running its Triple Merger Centre (TMC) in Mirpurkhas for a 4-year period, in the former's initiative in the area of healthcare. And while under the MoU signed with TCF, SSGC is

providing funds for running TCF Primary School in Dera Murad Jamali, Balochistan. The MoU signed with WWF Pakistan involves meeting expenses for organizing Green-Learn-n-Fun Program, Beach cleaning activities and School Outreach Program. For the first time, SSGC is providing financial support to IRC for the entire construction work of IRC House of Learning, Girls Elementary School in Jamshoro district.

The MD also gave away certificates of partnerships to all the four collaborative partners.

Before each of the representatives signed on the MoU documents, they apprised the audience about the salient features of their respective organizations. They said that their focus has been largely on educating the girls so that they could emerge as learned and empowered individuals. They praised the CCD team for efficiently working out the modalities of the agreements and for professionally organizing the signing ceremony.

Earlier, in her welcome address, Ms. Nasreen Hussain, DGM (CCD) said that, SSGC will soon be signing MoUs with four of the country's leading educational organizations namely Quaid-e-Awam University of Engineering, Science and Technology, Nawabshah, Mehran University of Engineering and Technology, Jamshoro, LUMS and IBA Karachi, to make

scholarships available for deserving students in varied disciplines.

Later, while talking to the media, the MD said that being a professor in the past, he would love to go back to the under-privileged areas of Khanot and Dera Murad Jamali and teach the students there. I have always been in favour of university faculty going to primary schools which are the building blocks of our education system, the MD mused.

The Company's senior management including Azim Iqbal Siddiqui, DMD (C&FS), Syed Hassan Nawab, DMD (O&P), Rahat Kamal Siddiqui, SGM (ES), Shaukat Baloch, ASGM (T), Zahid Mumtaz, ASGM (CS), Shahid H. Jafri, CFO, Yusuf J. Ansari, Company Secretary, Irfan Zafar, CTIO and other GMs and DGMs were also present on the occasion.

#### Accomplishment

#### Advertisements on duplicate bills

#### A cost-cutting solution from IT

The IT Department has implemented yet another innovative idea of printing advertisements on SSGC's duplicate bills.

The advertisement printing on duplicate bills is in addition to the advertisements already appearing on SSGC's regular gas bills.

The printing of advertisements has completely offset SSGC's monthly duplicate bills paper printing cost and is expected to generate additional revenue for the Company in future by exceeding

the break-even cost.

The initiative is being led by Mr. Mazhar Usman, Manager (VAS), IT who is ably assisted by his colleagues Sharjeel Jan, Naveed Shamim and Imtiaz Ahmed.

The IT team is also thankful to Ms. Baseera Manzir, DCM (CFC) for supporting them in the distribution of the duplicate bills.

Courtesy: IT Department

#### Debaters plead their case for conserving natural resources

HR-OD recently organized a persuasive speech competition among the Company executives. The speech contest which was the offshoot of HR-OD's regular debating competition was judged by Azim lqbal Siddiqui, DMD (C&FS), Syed Hassan Nawab, DMD (O&P) and Rahat Kamal Siddiqui, SGM (ES).

The competition was held on June 3, 2010. Syed Zill-e-Hasnain Rizvi (HR), Dr. Quratul-Ain (Medical Services), Wasim Rehmani (Materials Management) and Syed Amjad Ali (P&C) and three other contestants not just pleaded their case for the importance of natural resources but also suggested practical solutions.

Dr. Qurat-ul-Ain was adjudged winner on

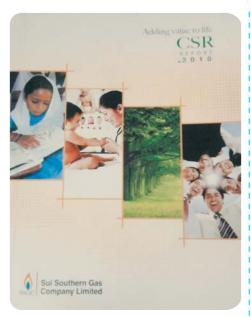

the basis of the pre-defined criteria of 3Ms - manner, method and matter. She was

presented with the Best Debater's Trophy by DMD (C&FS) and DMD (O&P).

#### CSR Report published - Adding Value to Life

In June 2010, Corporate Communication Department produced the second edition of the CSR Report with 'Adding Value to Life' being the central theme.

The Report comprehensively documents initiatives taken in the area of education. environment, health and community service from 2005 till date.

SSGC has been actively involved in Corporate Social Responsibility (CSR) initiatives since 2003, having adopted schools in its franchise areas of Sindh and Balochistan, providing scholarships to deserving students, helping healthcare organizations battle chronic diseases,

collaborating with relevant forums for environmental protection and reaching out to victims of natural catastrophes.

The last CSR Report was published in 2007 which detailed the companies initiatives from 2003 to 2007.

A business that makes nothing but money is a poor business - Henry Ford

#### SSGC runs defaulter ad campaign

After coming out of the shower, a young man complains to his sister-in-law that there was no hot water and demands a cup of tea. The hapless sister-in-law

reveals that her brother has failed to pay the gas bill despite repeated reminders and finally SSGC had to disconnect the gas supply and hence there can be no

tea as well. The message is clear: pay your bills on time to avoid embarrassment and disconnection. The ad is being aired on selected TV and FM channels.

#### A visit to a center of excellence

The CCD team led by its DGM, Ms. Nasreen Hussain visited Sindh Institute of Urology and Transplantation (SIUT), Pakistan's largest public sector health organization which provides free and modern medical care in kidney diseases and transplantation to all. The CCD visit, held on June 3, 2010 was part of the CSR initiative of sponsoring one day dialysis at SIUT whereby more than 650 patients will receive their dialysis entirely free of charge whereas free medicine will be provided to fifteen transplantation patients.

Laila Jamil, SIUT's Resource Generation and Outreach Officer escorted the CCD team to various sections of the Institute. One of the highlights of the visit was the Dialysis ward where the team met the children being treated there. It was really heart-rending to see the innocent children in distress at such a tender age. When the team gave them gift bags, pure happiness was written large on their faces.

Ms. Jamil also took the visitors for a round of the sprawling SIUT auditorium where a group photo was taken after a briefing. In the end, the team met one of SIUT's most experienced doctors, Dr. Altaf, to whom the visitor handed over a cheque of Rs. 0.95 million as financial support for incurring the above expenses. Dr. Altaf explained to the team that the Institute's patients are predominantly from the rural and poorer urban strata with virtually no access to medical facilities. He said that the Dialysis machine runs on a 24/7 basis and is only taken off when it has to be replaced. DGM (CCD) lauded the SIUT for its mission of providing free treatment with state-of-the-art equipments.

## CRD's Aslam wins 'Mr. Sindh' title

Customer Relations Department's Mohammad Aslam won the title of Mr. Sindh at the Inter-Sindh bodybuilding competition held at Sukkur Sports Club on April 27, 2010.

Earlier, on April 12, 2010, Aslam won the first position and the title of Mr. Karachi at a competition held at Custom Club.

Aslam who is a fitter at Karachi Terminal has been associated with body building for the last ten years.

## The day the right price mattered

A huge contingent of SSGC employees along with their families featured in the recording of GEO TV's version of the popular international game show The Price is Right. Hosted by veteran showman Ali Salman, the show involves the contestants guessing the price of branded products. At the preliminary game, Afia Siddiqa, DM (IT) who was among the seven contestants selected from random computer balloting was the first one to win a

return ticket to London. Another contestant, Marium Naveed, wife of Khawaja Naveed, DM (IT) fought competitively to win a sports kit and a spacious settee from well-known brands. The recording was held on May 30, 2010.

The SSGC contingent cheered enthusiastically for the participants. Salman Siddiqui, DCM (CCD) and Inayatullah Ismail, DCM (Media

Relations) efficiently handled everything from all mail user invitations to logistics to ensure that maximum number of executives and staff can be accommodated at the recording. Tremendous enthusiasm was witnessed among the would-be participants to register them for the show. This particular recording was also made possible by the personal efforts of Nadeem Qureshi, Incharge (HSE-Interior Sindh).

## Mock Drill conducted at Hyderabad Regional Office

lined up and head count was done by respective members of emergency response team. A demonstration of usage of fire extinguishers was also done during this process. Ambulance was also called from the medical centre which is located about 2 kms from Regional Office and it arrived within

5 minutes. All the blocks inside the premises were duly evacuated in 4 minutes and 10 seconds.

Before carrying out the activity, the entire neighborhood of Regional Office was informed to avoid an alarming situation outside the premises.

Although such a drill was conducted after a

considerable gap, a better home work made this exercise a thriving, edifying and panic free event.

Mr. Abdul Rasheed Khanzada, Regional Manager (Hyderabad) and Mock Drill team including Lead Manager Mr. Abdul Wahab Siddiqui, CM (Admin) and Assistant Lead Manager Flt. Lt. (R) Ikram Chaudry, Incharge Security and Site Emergency Controller and Syed Ghazanfar Ali Shah, S. E (Safety-HSE) and Monitor/Coordinator helped in conducting this exercise.

Everyone present at the drill pledged to successfully complete the next drill session within 3 minutes.

Courtesy: Engr. Nadeem Qureshi, Incharge (HSE-Interior Sindh)

Emergency responders wearing smartly designed caps started combing their respective areas in order to ensure that no one is left inside the premises.

us highly vulnerable to blasts and bullets. Yet.

as a valiant nation, we are bravely standing

up to nefarious crimes instead of running

away from them. To educate and prepare

our executives and workers at Regional Office,

Hyderabad, which is the second largest

establishment of SSGC after the Head Office,

for any emergency-like situation, a mock drill

was conducted on June 2, 2010.

The moment hooters were switched on, all

executives, staff, labourers and visitors

rushed towards the assembly area.

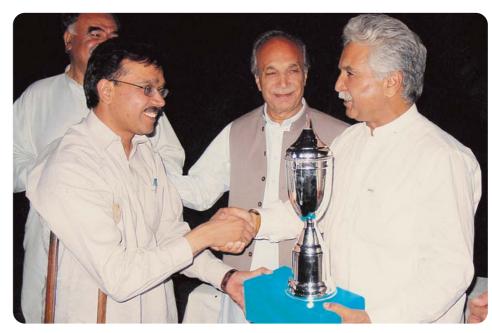

At the assembly area, all executives were

#### Another stellar performance from Shahzad Alam

SSGC's Dy. Chief Engineer Shahzad Alam who is also the National Chess Master has won the All-Balochistan Brown Gymkhana Chess Championship 2010 held in May 2010. Over thirty national players participated in the Championship held in Quetta.

Mohammad Azam Baloch, Secretary Information, Government of Balochistan presented a glittery trophy to Mr. Alam who has in the past won major national and international titles. He commended Mr. Alam for keeping the game of chess alive in Pakistan with his superlative feats both nationally and internationally.

Mr. Alam remained unbeaten throughout the seven-round Championship.

#### Informative seminar on osteoarthritis and back pain held at KT

Osteoarthritis is a type of arthritis that is caused by the breakdown and eventual loss of the cartilage of one or more joints. On June 23, 2010, Medical Services Department organized an extremely pertinent seminar on the topic of Osteoarthritis and lower back pain at Karachi Terminal for the benefits of the employees posted in the facility.

SSGC's consultant physician, Dr. Shoukat Nayani conducted this seminar for the main objective of creating awareness among the Company employees. Dr. Gul Hasan Khawaja was the chief guest on the occasion.

Dr. Nayani attributed the rising cases of Osteoarthritis to age factor, weight problems, lack of exercise and improper

posture. The learned doctor suggested that Osteoarthritis can be diagnosed through regular physiotherapy, regular weight reduction exercises and use of supportive devices such as walking sticks, knee bands and collar, all of which can help the employees to manage normal work once again.

In his lecture, Dr. Nayani talked about the rising incidence of back pain and discussed its major causes.

He repeatedly used a term called 'Back Pain Red Flags' which implies the doctor's warning signs that a patient's back needs urgent medical attention. Dr. Nayani explained the 'Back Pain Red Flags' by identifying the following:

Age bracket of younger than 20 and

older than 55 and having back pain for the first time

- Deteriorating back problem
- Past history of back pain and cancer
- Back pain with significant weight loss
- Urinary or bowel problems
- Debilitating back pain showing no signs of reduction even after 4-6 weeks

Dr. Nayani referred to a study which dispelled the impression that whenever a person is suffering from a back pain he must avoid immediate bed rest that could lead to debilitation, morning sickness, disability and difficult rehabilitation.

In conclusion, the learned doctor summarized the contents of the lecture. A guestion and answer session followed.

#### Shaheed Benazir's birthday celebrated in Quetta's RO

The 57th birthday of Shaheed Benazir Bhutto, former Prime Minister, was celebrated on June 21, 2010 at the SSGC Regional Office, Quetta. The program was organized by Abdul Razzaq Kakar, President Action Committee SSGC Employees, Quetta and Haji Mohammad Arif, General Secretary, Action Committee Quetta.

Mir Sadiq Ali Umrani, a senior Peoples Party member and Provincial Minister for Works and Communications, Government of Balochistan was the chief guest on the occasion. He shed light on the life of Shaheed Benazir Bhutto and her struggle for true democracy. The Minister also praised the organizers for arranging the celebration.

Mr. Haroon Rashid, DGM-D, Quetta Region welcomed the chief guest. He also cut the cake on the occasion as the Quetta executives and staff joined in to celebrate the occasion.

All the staff members participated in the program with tremendous zeal.

#### Famous Last Words

Liaquat Ali Khan (1896-1951) [First Prime Minister and Defence Minister of Pakistan] "May God keep Pakistan safe." (Right before being assassinated).

John Fitzgerald Kennedy (1917-1963) [US President] "If someone is going to kill me, they will kill me." (On arriving in Dallas, Texas in '63).

Max Baer (1909-1959) [American boxer, Heavyweight Champion 1934-5] "Oh God, here I go...".

Ned Kelly (1854-1880) [Australian folk hero and outlaw]. "I suppose it had to come to this. Such is life." (As the hangman adjusted the hood to cover his face).

Malcolm X (1925-1965)
[American black nationalist leader]
"Cool it, brothers..." (His last words before being assassinated).

George Bernard Shaw (1856-1950) [Irish playwright] "I want to sleep...".

James Brown, (1933-2006) [American singer] "I'm going away tonight" (Reported by his personal manager, Charles Bobbit, who said he was at Brown's bedside when he died, and added that Brown said the statement above, then took three long, quiet breaths, and closed his eyes).

William Somerset Maugham (1874-1965) [British author] "Dying is a very dull and dreary affair. And my advice to you is to have nothing whatever to do with it".

Charlie Chaplin,
(1889-1977) [Actor]
When the priest who was
attending him at his bedside
said, "May the Lord have mercy
on your soul", Chaplin is reported
to have replied "Why not? After all, it
belongs to him".

## Thumbs-up to a positive work ethic

In his appreciation letter to Quality Aviation's Travel Desk Officer, Mr. Anees Asghar (SSGC Implant Officer), Amir Mumtaz Khan, GM (Admin. Services) admired the efficiency of this young officer in managing travel arrangements.

GM (Admin. Services) hailed him for his 'cheerful demeanor... combined with a positive work ethic'. The appreciation letter is reproduced here.

Concerned SSGC officials can contact Asghar round the clock on 0300 7000294 and 0323 374737 for travel enquiries and arrangements and even in the event of emergencies.

#### **Transitions**

- Ahmed Ali Khan s/o Amir Mumtaz Khan, GM (Administration) passed away on May 29, 2010 in a tragic accident.
- Sofia Mukhtiar d/o Mukhtiar Ali Khoso, Asst. Engineer (P&C), Civil expired on June 6, 2010.
- The grandmother of Summera Shaheen, Secretary to DGM (CCD) breathed her last on June 14, 2010.

May their souls rest in eternal peace, Ameen.

#### **Umrah felicitations**

Zahid Mumtaz, ASGM (CS) and Aminullah Khan, GM (CRD) seen here receiving Dr. Faizullah Abbasi, MD, SSGC on his return from Umrah

#### Certificate of participation

Muhammad Ali Gohar, Manager (CCD/CSR) is seen here receiving Certificate of Participation from Hamidullah Khan Afridi, Federal Minister for Environment, Government of Pakistan during the launching ceremony of Green Club Campaign and Tree Plantation organized by National Forum for Environment and Health (NFEH) at the Mazar-e-Quaid. Gohar also conducted the proceedings

#### For deserving patients

A representative of Nighaban Welfare Association, Civil Hospital Karachi receiving a cheque from Nasreen Hussain, DGM (CCD) to help the Association provide improved health care to help deserving patients with free treatment, medicine and surgical procedures, as part of the Company's CSR initiative in the area of health

# Financial Support for needy students

Nasreen Hussain, DGM (CCD) presenting a cheque to Ms. Nasiba Channa, President Saswi Woman Welfare Association (SWWA), Ratodera District, Larkana to help SWWA purchase essential items for deserving students of Sasw Model School, Taluqa Ratodera, as part of the Company's CSR initiative in the area of health

# For the marginalized community

Nasreen Hussain, DGM (CCD) seen here presenting a cheque to the representative of Koohi Goth Hospital which is dedicated to the treatment of under-privileged students

#### Pictorial Coverage

#### **Petroseal Presentation**

Mr. Francis Catel, Export Sales Manager, Petroseal, a French Company, gave a presentation on the topic of 'Online Leak Sealing for reducing UFG'. The presentation was organized by the Company's Distribution Department. SSGC's senior management including Syed Hassan Nawab, DMD (O&P), Mr. Salim A. Mughal, SGM (Distribution), Shoaib Warsi, GM (O)-D, Mr. Shabbir Ratlamwala, GM (D), Fayyaz Merchant, GM (Sales) along with other executives attended the presentation on Petroseal's products and services. Mr. Muhammad Babar, C.E.O of Interlink, Petroseal's representative in Pakistan arranged the presentation

#### **DAC** meeting

A Departmental Accounts Committee (DAC) meeting in session in June 2010. Azim Iqbal Siddiqui, DMD (C & FS), Shahid H. Jafri, CFO, Mir Shahid Ali, AGM (Treasury), and I. M. Noorani, GM (Internal Audit) can be seen in the picture with MP & NR officials during the presentation

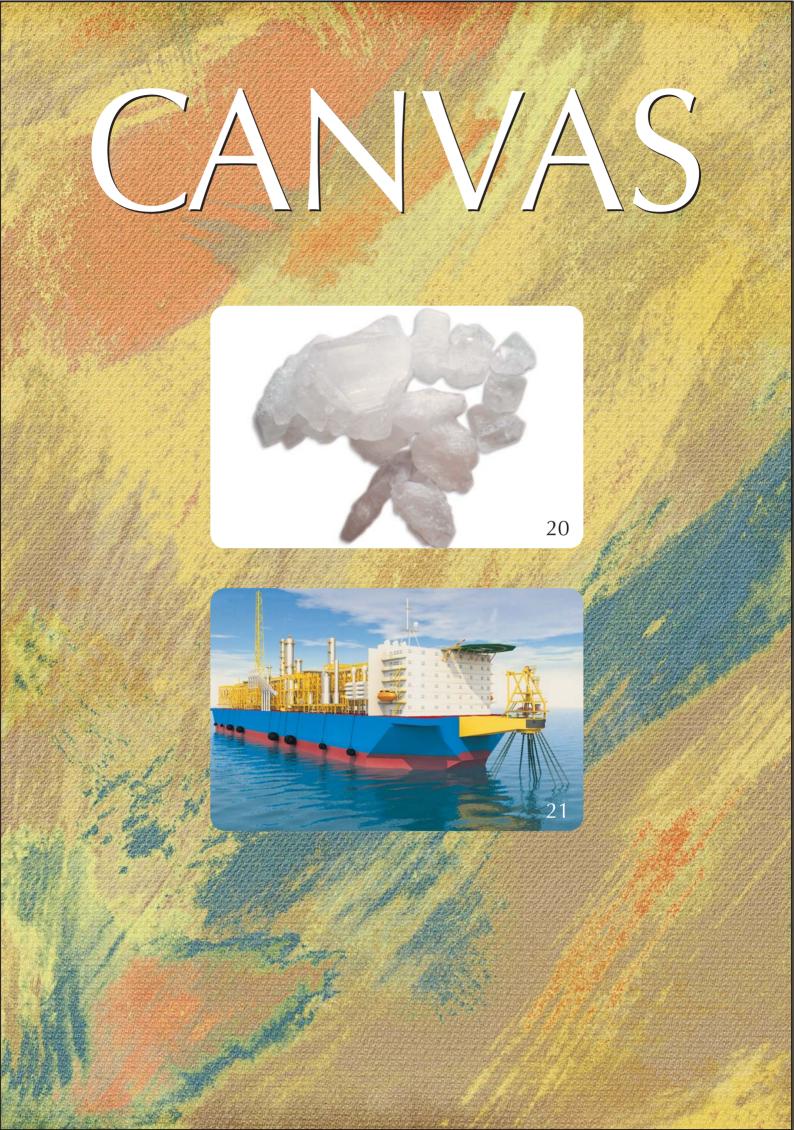

Peoples Labour Union (CBA) held a reception at the Karach Head Office on June 24, 2010 to welcome Irshad Mangi Azizullah Panhwar and Sikander Jamali to the fold. CBA's office bearers including Ejaz Baloch, President, Riaz Akhtar Awan Chairman and Rizwan Mullah, General Secretary welcomed the three gentlemen to PLU. The new PLU members appreciated the Union for its exemplary performance during its stint in the office and congratulated it for passing the charter of demands in the quickest possible time

# THE-ILAN IN IEGGE

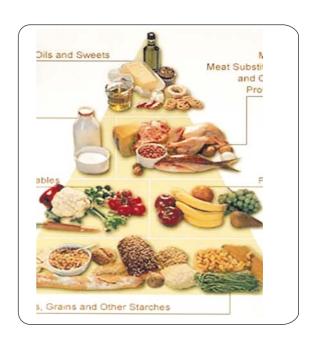

#### **Diabetes Mellitus**

Our body tries to keep our level of blood sugar within a certain range through the action of insulin activity. A deficiency or absence of this hormone secreted by pancreas results in Diabetes-Mellitus, of which there are two types. The range for normal blood glucose level has recently been modified by the American Diabetic Association. To diagnose whether a person has Diabetes-Mellitus, the blood sugar levels are as mentioned in the table below:

#### **Blood Sugar Levels**

State	Normal	Impaired Glu. Tolerance	Diabetic
Fasting Plasma Glucose	<100	100-125	>126
2 Hours after a meal	<140	140-200	>200

In order to reduce the adverse effects of Diabetes-Mellitus, the levels of blood sugar to be maintained must be known to every patient and more so, to every health care provider. The targets in this regard are fasting blood sugar, one and two hours blood sugar level after a meal and hemoglobin A1C levels. This later parameter gives the level of blood sugar for the previous 6-8 weeks and is good in assessing the long-term sugar control.

#### Targets for control of blood sugar in diabetic patients

Fasting Plasma Glucose	90-130 mg/dl
1-Hour after meal Blood Glucose	<180 mg/dl
2-Hour after meal Blood Glucose	<150 mg/dl
Hemoglobin A1C level	Not more than 1% above the normal limit

Source: NICVD Bulletin

#### Benefits of Alum

- Alum stones work as a deodorant by leaving a fine salty, slightly alkaline film on the skin, preventing the growth of microbes (bacteria).
- The astringent property of alum helps to prevent and reduce bleeding in minor cuts and abrasions.
- Alum stones are made from natural mineral salts that will not stain your clothes.
- Alum stones can be stirred around a water tank to filter out dirt and soil.
- Young girls during their pre-puberty stage are advised to use alum as they tend to smell/sweat a lot. Alum prevents them from getting bad body odour.

## Oil and gas companies see global gas glut until 2014

Gas markets will be in surplus for at least the next four years, and even after the glut eases, US and European prices will not achieve parity with oil, energy companies said in a recent Summit. "Gas faces a bubble - especially in the Atlantic Basin," Jean-Jacques Mosconi, head of strategy for Total SA, said. "It is coming from the economic crisis plus a surge of unconventional gas production from the United States.'

The gas market has been hit by a collapse in demand since the onset of the global financial and economic crisis in 2008. which coincided with a surge in output of gas, particularly from new areas such as shale fields in the United States.

As a result, gas prices have collapsed. Based on its ability to generate heat - or "calorific value"-natural gas should be worth around one sixth of the cost of oil. which with oil prices around \$ 70 per barrel should put gas close to \$ 12 per million British thermal units (mmbtu). In fact, benchmark US gas futures prices have not been close to \$ 12 for almost two years and on Wednesday were trading around \$4.12 per mmbtu. Energy companies see little chance of an easing of the glut.

Ulrich Jobs, chief operating officer of RWE Group, presented a gloomy picture: "Oversupply might be ending by 2015. Some people say five years, some people say two years." Carlo Malacarne, head

of Snam Rete Gas, continental Europe's leading regulated gas operator by assets, agreed: "I don't think over supply will remain in place beyond 2015." Total's Mosconi said that even after global gas demand picked up and the gas market bubble eased, prices would still not recover properly in western markets.

While Asian gas prices may stay within striking distance of parity with oil, prices in the US and Europe would be much weaker in what would effectively be a two-tier market. "At the end of the bubble, we believe in oil parity for the Asian market but not for the Western market," he said. "Because of the surge in shale gas in the US market we will remain driven by the break-even point of shale gas and we see that at roughly \$ 6-7/mmbtu," Mosconi said.

#### Yemen LNG says production nears 100%

Yemen LNG said its first train was producing at 99 per cent availability and its second train at 91 per cent availability, the company's general manager said recently.

In October 2009, production started at the first train of the \$4.5 billion (Dh 16 billion) project to produce LNG-natural gas chilled to its liquid form for delivery to markets by ships.

"Our production is now reaching the maximum and we look forward to achieving the objective of production in 2010 of the budget," Francois Rafin, general manager of Yemen LNG, said in a speech at the

inauguration of its second train.

The project had stayed within budget, he added. It was the first LNG plant in Yemen, the Arab world's poorest state which just emerged from a violent civil war, and its largest industrial project.

The government hopes LNG exports will offset the impact of rapidly falling oil output on state revenues and boost economic growth. Rafin also said 29 LNG cargoes had moved so far, and that cargoes were moving at a rate of two per week to countries including the United States, South Korea, Mexico, Britain, India and China.

#### The Big Slick: Inside the Gulf of Mexico fiasco

Deep water oil and gas exploration will remain one of the world's "pillars of supply" for its energy needs despite its high-risk exposure to remote locations and commodity price volatility. Today 25% of USA's oil and gas production comes from GOM, which is a significant figure. To date GOM has yielded more than six billions barrels of oil and 120 tcf gas from over 30,000 wells drilled in GOM, Compared to this, approximately 5.0 million barrels of oil which is 0.033% will be the total leakage for, from the present oil spill (May-August 2010 period). In fact, offshore oil production continues to rise. At 27mn bpd, including NGL's, it now makes up to 34% of global production, having risen from 26% in 1990. Meanwhile offshore gas

production has risen more rapidly to the equivalent of 15.5 mn bpd, in 2008. It was only17.5 % of total gas production in 1990 and now stands at 29%. Offshore fields have yielded nearly 70% of the major oil and gas discoveries in the last 10 years. With perseverance and technology, the oil and gas industry has advanced by turning ideas once deemed

impossible into reality. The development of unconventional oil and gas reservoirs, in last few years, shows how the industry can turn a problem truly viewed as impossible into a stunning reality. Technology, creativity, and a belief in possibility combine to form a "new reality".

The industry is going in water depth and drilling depth (up to 40,000 feet), that poses many new challenges. We need to have the best hydraulics down hole and most efficient high-pressure mud pumps. The industry has to use smart technologies to control vibration in the drill string, monitor down hole conditions and handle drilling based on what we see down there. Industry has to retain key personnel and maintain equipment in an efficient way. As going deeper will need 3.6 million-lb tension assessment.

#### Present incident in GoM: the largest oil/gas spill in US history

On April 20, 2010, an explosion aboard the Deepwater Horizon, a drilling rig leased by the oil company British Petroleum (BP), set

capacity, the industry needs to be efficient; carrying out risk assessment of major overhauls and spending money wisely. Training of people at all times and challenge of holding on to key employees is a continuing on-going requirement. The biggest challenge faced is always safety. There is a moral obligation for every person working on the offshore rig to bring them back safely. Overall, the concern is effective control of work and hazard recognition/risk

ig. 3. Cross-section of various wells in the Gulf of Mexico, indicating varied vertical lepths and geological formations.

off a blaze that killed 11 crew members. Two days later, it sank about 50 miles off the Louisiana coast and crude oil began gushing out of a broken pipe 5,000 feet below in the sea. A month later, after a series of failed attempts to plug the leak, oil had begun to stain the coasts and marshes of Louisiana and Alabama. The spill appears to be the worst oil disaster in American history: by the most conservative of the government estimates released on May 27th, the spill by then had released almost twice as much oil as the Exxon Valdez. which spilled about 250,000 barrels of oil into Prince Williams Bay in Alaska in 1989. Exxon spent \$ 3.4 billion in clean up costs, fines and compensatory payments for the Exxon Valdez spill in Alaska in 1989. However in terms of sheer volume, all of these spills are dwarfed by the oil that flowed By Mustafa Abdulla, GM (CP)

when retreating Iraqi troops blew up oil terminals and wells in Kuwait in early 1991: more than 300 million gallons.

The Deepwater Horizon rig was described before the accident as one of the most technologically advanced drilling platforms in the world. The rig had drilled a well in the sea floor and was in one of the last phases of the operation, building a cement casing to reinforce the well. While investigations continue into what set off the April 20th explosion, igniting an intense blaze that sent enormous plumes of flame shooting into the air. Workers from the rig and company officials have said that hours before the explosion, gases were leaking through the cement. The rig was owned by Transocean and had been leased to BP; it

> was being operated by Transocean and the cement work was being done by Halliburton. All three companies have sought to deflect blame onto others.

Other scientists said they had also found giant plumes of oil mixed with water in the depths of the gulf, including one as large as 10 miles long, 3 miles wide and 300 feet thick. Estimated

leaking oil is 25,000 barrels a day.

Leaks from wells are supposed to be blocked by devices called blowout preventers (BOP). In this case the BOP was a 450-ton equipment, remotely monitored which was presumably not up to the mark. The BOP in this BP well could not be turned on at the time of the blast, and attempts to use submersible vehicles to activate it also failed. BP then constructed a 90-ton containment dome, which it lowered onto the leak in the hope of funneling the oil up through a pipe. The dome became cloqged with ice, as did a smaller "top hat" tried next to contain oil and gas out at over 5,000 psi pressure.

The Coast Guard and the oil company worked to contain the oil slick within booms

#### **Environmental Disaster**

and succeeded in burning only small amounts of oil. BP applied chemical dispersants on the subsea oil leaks to help break up the oil so that it can degrade before reaching the surface. Meanwhile, controlled burns are being done on open water to eliminate some of the oil slick before it reaches shore. Skimming vessels and booms also are being used to prevent much of the oil from reaching shore. Airplanes are spraying chemical dispersants on oil after it reaches the water's surface.

#### What possibility went wrong in this case

Internal documents from BP show that there were serious problems and safety concerns with the Deepwater Horizon rig far earlier. The problems involved the well casing and the blowout preventer, which are considered critical pieces in the chain of events that led to the disaster on the rig. The documents show that in March, after several weeks of problems on the rig, BP was struggling with a loss of "well control."

As far back as eleven months ago, it was concerned about the well casing and the blowout preventer. On June 22nd, for example, BP engineers expressed concerns that the metal casing the company wanted to use, might collapse under high pressure. The working pressure at these wells is as high as 10,000 psi. "This would certainly be a worst-case scenario," Mark E. Hafle, a senior drilling engineer at BP, warned in an internal report. "However, I have seen it happen so I know it can occur." The company went ahead with the casing, but only after getting special permission from BP colleagues because it violated the company's safety policies and design standards. The internal reports do not explain why the company allowed for an exception. A BP document released to The New York Times revealed that company officials knew the casing was the riskier of the two options.

In April of this year, BP engineers concluded that the casing was "unlikely to be a successful cement job," according to a document, referring to how the casing would seal to prevent gases from escaping up the well.

The documents also says that the plan for casing the well is "unable to fulfill M.M.S. regulations," referring to the Minerals Management Service.

In addition to focusing on the casing, investigators are also focusing on the blowout preventer, a fail-safe device that was supposed to slice through a drill pipe in a last-ditch effort to close off the well when the disaster struck. The BOP did not work, which is one of the reasons oil has continued to spill into the gulf, though the reason why it failed remains unclear.

The documents show that in March, after problems on the rig that included drilling mud falling into the formation, sudden gas releases known as "kicks" and a pipe falling into the well, BP officials informed federal regulators that they were struggling with a loss of "well control." On at least three occasions, BP records indicate, the blowout preventer was leaking fluid, which the manufacturer of the device has said limits its ability to operate properly. When the blowout preventer was eventually tested, it was tested at a lower pressure 6,500 psi rather than the 10,000 psi test used on the device earlier. "The most important thing at a time like this is to stop everything and get the operation under control," said Greg McCormack, director of the Petroleum Extension Service at the University of Texas, Austin, offering his assessment about the documents. He added that he was surprised that regulators and company officials did not commence a review of whether drilling should continue after the well was brought under control Bob Sherrill, an expert on blowout preventers and the owner of Blackwater Subsea, an engineering consulting firm, said the conditions on the rig in February and March and the language use by the operator referring to a loss of well control "sounds like they were facing a blowout scenario."

Cameron, the company that manufactured a "blowout preventer" that failed to function after the explosion, and Halliburton, which performed drilling services like cementing, could in turn face claims too.

#### Conclusion

- Analysts estimate that BP's total liability for the environmental catastrophe, including the cleanup, compensation claims, government penalties, and a host of civil lawsuits, could reach US \$ 30 to 50 billion. BP has already deposited US \$ 20 billion for this purpose. BP made US \$ 16.7 billion profit last year.
- A blow to credibility must not limit the oil and gas industry's ability to discuss technical problems. Existence of problems is no scandal. Deep water creates problems, response to which must be continues and accessible. The fatal blowout of the deep water Macondco well and consequent oil spill in the Gulf of Mexico has, of course, discredited the industry.
- If a chastened industry is to earn back the acceptability of deep water work, its professionals must feel free to address problems openly and candidly.
- A prominent mystery in the Deepwater Horizon disaster, of course, is the BOP's apparent failure. On the basis of concerns raised in papers presented at technical conference and in MMS studies, alleges that the industry already possessed incriminating knowledge of BOP problems.
- The final plugging of the well will have to wait until August, when the two relief wells are scheduled to be completed. Those wells are being drilled diagonally to intersect with the runaway well following which heavy liquids and cement will be injected to block the well. One relief well will be drilled as a backup to the first relief well, in case the first relief were to run into problems. Drilling of the first relief well started May 2 and is expected to take up to 90 days. It had reached 9,000ft of its total 18,000 ft of May 10. Similar procedure was successfully employed to block the leaking oil in a similar off-shore incident that happened in the year 2000 in Mexico's waters (in GOM).

However, at that time the well was shallower but the time taken was almost 10 months to seal the leaking well. Today technology is far more advanced.

#### System Analysis

#### SSGC's P&D Department utilizes latest technology

#### Role of simulation/pipeline studio software

Simulation is basically the replication of some real thing, state of affairs, or process which represents certain key characteristics or behaviors of a selected physical or conceptual system. Computer simulation is generally associated to some "Computerized Results" on any generated, prototype, or actual model.

The system analysis of the gas transmission/distribution pipeline network is an ongoing exercise to determine the performance and capabilities of the network and to depict its behavior under various conditions. Therefore, the system can be analyzed for the required future performance in order to find out its shortcomings and deficiencies in the days and years ahead.

Simulation, being a potential technique of system analysis has been rapidly adapted in worldwide gas industries. Various scenarios/exercise have been carried out on the computerized model and by changing the variables predictions may be made about the behavior of the system.

On the basis of simulated results, the performance, efficiencies and financial viabilities are judged before actual implementation.

The most frequently used tool for simulation is PL Studio. PL Studio stands for Pipeline Studio formerly known as TGNET (Transient Gas Network). It is a simulation License Software Program which can help in planning, designing, forecasting & monitoring functions of gas pipelines network. It is operated through Dongle Switch (a bitlock device mounted on parallel port of PC).

PL Studio is capable of accurately representing very large and complex pipeline networks due to its wide range of components model and its advanced solution technique. Calculated results are presented in reports of important system variables (such as pressure, flow, temperature, velocity, GCV, SG etc.) at all system supply, delivery and equipment location.

With the help of Pipeline Studio, engineers and planners are able to get accurate

information to make decisions leading to improvements in pipeline design, performance and throughput. Engineers can achieve optimum system performance and create emergency plans without interrupting online production.

PL Studio performs two types of simulations – steady state & transient. A steady state analysis calculates the operating conditions of the pipeline at equilibrium based upon specified inlet/outlet boundary conditions and equipment set-points. Steady state is an effective tool for checking a proposed design for its performance in normal operation.

The purpose of such analysis is to conceptualize the requirement of new pipeline and compression projects for the

network based analysis.

In a wide spectrum pertaining to design point of view, PL Studio is used for;

- Existing gas pipeline network modeling
- Conceptual & simulation study for newly discovered gas fields
- · Gas flow and pressure calculations
- Selection of optimum pipeline diameter
- Selection of compressor location and horse power
- Calculation of line pack
- Miscellaneous design calculations

Transient simulation is actually time dependant and provides variations in the demands and supplies with respect to any given time to verify online conformity and observation which can also be linked with SCADA (Supervisory Control & Data Acquisition) for effective manipulation of results used for accessing operational tasks.

# Study: Replacing white rice with brown rice may reduce diabetes risk

In a new study, researchers from the Harvard School of Public Health (HSPH) have found that eating five or more servings of white rice per week was associated with an increased risk of type 2 diabetes. In contrast, eating two or more servings of brown rice per week was associated with a lower risk of the disease.

The researchers estimated that replacing 50 grams of white rice (just one third of a typical daily serving) with the same amount of brown rice would lower risk of type 2 diabetes by 16%. The same replacement with other whole grains, such as whole wheat and barley, was associated with a 36% reduced risk.

Brown rice is superior to white rice when it comes to fiber content, minerals, vitamins, and phytochemicals, and it often does not generate as large an increase in blood sugar levels after a meal. Milling and polishing brown rice removes most vitamins and minerals. In addition, milling strips away most of its fiber, which helps deter diabetes by slowing the rush of sugar (glucose) the bloodstream.

#### Humour

#### Why I love this Doctor

Doctor, I've heard that cardiovascular exercise can prolong life. Is this true? Your heart is only good for so many beats, and that's it... don't waste them on exercise. Everything wears out eventually. Speeding up your heart will not make you live longer; that's like saying you can extend the life of your car by driving it faster. Want to live longer? Take a nap.

Should I cut down on meat and eat more fruits and vegetables? You must grasp logistical efficiencies. What does a cow eat? Hay and corn. And what are these? Vegetables. So a steak is nothing more than an efficient mechanism of delivering vegetables to your system. Need grain? Eat chicken. Beef is also a good source of field grass (green leafy vegetable).

How can I calculate my body/fat ratio? Well, if you have a body and you have fat, your ratio is one to one. If you have two bodies, your ratio is two to one, etc.

What are some of the advantages of participating in a regular exercise program?

Can't think of a single one, sorry. My philosophy is: No Pain...Good!

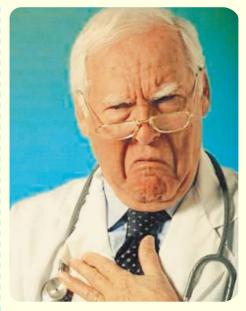

Aren't fried foods bad for you? YOU'RE NOT LISTENING!!! ..... Foods are fried these days in vegetable oil. In fact, they're permeated in it. How could getting more vegetables be bad for you?

Will sit-ups help prevent me from getting a little soft around the middle? Definitely not! When you exercise a muscle, it gets bigger. You should only be doing sit-ups if you want a bigger stomach.

#### Is chocolate bad for me?

Are you crazy? HELLO. Cocoa beans! Another vegetable!!! It's the best feel-good food around!

Is swimming good for your figure? If swimming is good for your figure, explain whales to me.

Is getting in-shape important for my lifestyle?

Hey! 'Round' is a shape!
Well, I hope this has cleared up any
misconceptions you may have had
about food and diets.

Courtesy: forwardedmails.com

#### Human Resource

#### Keep it up!

The following employees' children recently passed their examinations with flying colours:

Anam Abdullah, d/o Mustafa Abdullah, GM (Corrosion Prevention) achieved her Bachelor of Arts (A.B.) degree, graduating magna cum laude (cumulative average of 3.80) from Lafayette College, Easton, Pennsylvania in May 2010. She attained her honours in Economics. Here she is seen in the 2nd row (far right) with her graduating batchmates at the College's 175th Annual Commencement

Shahneela d/o Imdad Ali Behan, Asst. Manager Finance Dept. Hyderabad, has secured 3rd position A 1 Grade (82.9 %) in Class VII Examination from Khan Muhammad High School, Hyderabad

Sanober Gul d/o Akhtar Hussain Soomro, Asst. Engineer (Operations) HQ-2 Nawabshah secured 4th Position (95.29%) in her Class I Examination from Gallant Foundation School, Nawabshah

Nouman Mustafa s/o Akhtar Hussain Soomro, Asst. Engineer (Operations) HQ-2 Nawabshah secured A Plus Grade (85.60%) in his Class III Examination from Gallant Foundation School, Nawabshah

Asghar Ali s/o Zeb Ali Solangi, Executive (CRD) Larkana, secured 1st Position in his Class VII Examination from Quaid-e-Awam Public School, Larkana

Beenish Fatima d/o Syed Zamin Abbas, Sr. Fitter (CRD), secured 5th Position (A Plus) in her Class VI Examination from National High School, Karachi

Alishba Zamin Abbas d/o Syed Zamin Abbas, Sr. Fitter (CRD), secured 3rd Position in her Class I Examination from National High School, Karachi

Mohammad Hassan Ahmed s/o Farooque, DE(MM), secured 1st Position in his Class IV Examination from St. Lawrence's Boys School, Karachi

Fiza Dilawar Hussain Zardari d/o Dilawar Hussain Zardari, Manager Sales Hala, secured 1st Position in her Class Nursery KG from A to Z Eagles Academy High Educational Institute Sarhari District, Sanghar

Sannya Wasim d/o Wasim Yasin, Computer Supervisor, Billing Department, HO passed her Class III Examination from St. Joseph's Convent High School, Karachi securing 84.9%

Javeria Saeed d/o Saeed Muhammad Ismail, Sr. Sup. Bills NLO Finance Head Office, secured A 1 Grade (89.3%) in her Class III Examination from S.M. Public School, Karachi

(R to L):
Manager (Finance) Mujeeb-ur-Rehman Ansari's three sons, Sami-ur-Rehman,
Haseeb-ur-Rehman and Fasih-ur-Rehman achieved 1st Positions in their
respective VIII, VI and III Classes' Examinations

## SSGOA organizes Haj and Yatra balloting

Haj and Yatra balloting was held for SSGOA members at the Head Office auditorium on June 22, 2010. The Company management drew the names of the lucky winners through a ballot witnessed by packed to capacity audience comprising of SSGC team. Salim Abbas Jilani, Chairman, Dr. Faizullah Abbasi, MD, Azim Iqbal Siddiqui, DMD (C&FS), Syed Hassan Nawab, DMD (O&P), Zuhair Siddiqui, SGM (MS), Shahid H. Jafri, CFO, Shaukat Baloch, ASGM (T), Zahid Mumtaz, ASGM (CS) and Abdul Majid Malik, AGM (Admin) picked the names of the fortunate pilgrims. SSGOA office-bearers led by Dr. Ejaz Ahmed, President and Shahabuddin Siddiqui, General Secretary and other members hosted the ceremony in an impressive manner.

شرکت کی ۔شو برنس کی معروف شخصیت علی سلمان کی میز بانی میں اس پروگرام میں برانڈ ڈمصنوعات کی درست قیمت کو بوجھنا ہوتا ہے۔ ابتدائى مقابلے میں عافیہ

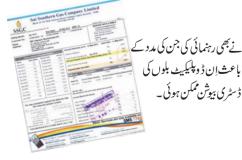

ڈسٹری بیوشن ممکن ہوئی۔

شرکت یقینی بنائی جا سکے۔شومیں شرکت کرنے اور رجسٹریشن کروانے کے لئے اسٹاف کی جانب سے انتہائی جوش وخروش د نکھنے میں آیا۔ مذکورہ ریکارڈ نگ ندیم قریشی انچارج ایچالیس ای،حیدر آباد کی ذاتی کوششوں ہے ممکن ہوئی۔

## ڈوپلیکیٹ بلوں پراشتہارات کی طباعت

آئی ٹی ڈیارٹمنٹ کی جانب سےایک اورنخلیقی آئیڈیئے کے تحت سوئی سدرن گیس کمپنی کے ڈوپلیکیٹ بلوں پراشتہارات شائع کئے گئے۔بلوں کی نقول پرشائع کئے جانے والے پیاشتہارات سوئی سدرن کیس کمپنی کے با قائدہ بلوں پرشائع ہونے والےاشتہارات کےعلاوہ ہیں۔ان اشتہارات نےسوئی سدرن کیس کمپنی کے

ڈ وپلیکیٹ بلوں کے پیریرآنے والے اخراجات کو بڑی حد تک ختم کر دیاہےاور جو مستقبل میں منافع بخش بھی ثابت ہوسکتا ہے۔ مذکورہ قدم مظهرعثان مینیجر (وی اے ایس)، آئی تی کی سربراہی میں اٹھایا گیا جسٰ میں اُن کی معاونت کے فرائض شرجیل جان ،نوید شیم اورامتیاز احمہ نے انجام دیئے۔ آئی ٹی کیٹیم کی بصیرہ منظر،ڈی سی ایم (سی ایف سی)

## جاب اور کام

نو جوان کی آئکھوں میں آنسو تھے،اس نے بلکوں پرٹشور کھ لیا،ہم سب چند کھوں کے لئے خاموش ہو گئے ۔آپ ایک لمجے کے لئے خودسوچئے اگرآپ نے اچھی پوزیش کے ساتھ ایم لی اے کیا ہو لیکن آ پنوکری کیلئے جہاں بھی درخواست دیتے ،آپ کو صاف جواب ل جاتا تو آپ پرکیا گزرتی للمذانو جوان بری طرح ماییس تھا۔ میں نے اس سے کہا" میں تہمیں ایک کہانی سنا تا ہوں"اس نے سراٹھا کرمیری طرف دیکھا۔ میں نے عرض کیا" کیپ ٹاؤن کی میڈیکل پو نیورسٹی کولمبی دنیامیں نمایاں مقام حاصل ہے۔ دنیا کا پہلا بائی پاس آپریشن اسی یو نیورسٹی میں ہوا،اس یو نیورسٹی نے تین سال پہلے ایک ایسے سياه فام شخص کو" ماسٹرآ ف ميڈيسن" کي اعزازي ڈگري دي جو زندگی میں بھی اسکول نہیں گیا۔ جوانگریزی کاایک لفظ نہ بڑھ سكتا تھانہ بىلكھ سكتا تھالىكن 2003 كى ايك ضبح دنيا كے مشہورسر جن پروفیسر ڈیوڈ ڈینٹ نے یو نیورسٹی کے آ ڈیٹوریم میں اعلان کیا،ہم آج ایک ایسے مخص کومیڈیسن کی اعزازی ڈ گری دے رہے ہیں جس نے دنیا میں سب سے زیادہ سرجن پیدا کئے، جوایک غیرمعمولی استاداور جیران کن سرجن ہےجس نے میڈیکل سائنس اور د ماغ کوجیران کر دیا ہے۔اس کے ساتھ ہی یروفیسر نے ہملٹن کا نام لیااور بورے آڈیٹوریم نے کھڑے ہوکراس کااستقبال کیا۔ بیاس پور نیورٹی کاسب سے بڑااستقبال تھا"۔ نو جوان سنتار ہا۔ میں نے عرض کیا" ہملٹن کیپ ٹاؤن کے ایک دور دراز گاؤں سنیانی میں پیدا ہوا۔اس کے والدین چرواہے تھے بحیین میں اس کا والدیپار ہوا تو وہ بھیٹر بکریاں چھوڑ کر کیپ ٹاؤن آ گياجهان کيپ ڻاؤن يو نيورڻي مين تغميرات جاري تھيں ۔وہ وہاں مز دور بھرتی ہوگیا۔اسے دن بھر کی محنت کے بعد جتنے بیسے ملتے، وه انہیں گھر بھجوادیتااورخود جنے چبا کر کھلے میدان میں سوجا تا۔وہ برسول مز دور کی حیثیت سے کام کرتار ہالتمیرات کا سلسلختم ہوا تووہ یو نیورشی میں مالی بھرتی ہو گیا۔اسے ٹینس کورٹ کی گھاس کا ٹنے کا کام ملا، وه روز ٹینس کورٹ پہنچتااورگھاس کا نٹنا شروع کردیتا، وہ تین برس تک بیکام کرتار ہا پھراس کی زندگی میں ایک عجیب موڑ آیا اوروہ میڈ یکل سائنس کے اس مقام تک پہنچ گیا جہاں آج تک کوئی دوسراتخف نہیں پہنچا۔نو جوان سیدھا ہوکر بیٹھ گیا۔میں نے عرض کیا "پروفیسررابرٹ جوئز زرافے پرتحقیق کررہے تھے،وہ ہددیکھنا جاہتے تھے جب زرافہ یانی پینے کے لئے گردن جھکا تا ہےتواسے شی کا دوره کیون نہیں پڑتا،انہوں نے آپریشن ٹیبل پرایک زرافہ لٹایا، اسے بے ہوش کیالیکن جوں ہی آ پریشن شروع ہواز رافے نے

گردن ہلا دی چنانچہانہیں ایک مضبوط شخص کی ضرورت پڑگئی۔ پروفیسرتھیٹر سے باہرآئے ،سامنے ہملٹن گھاس کاٹر ہاتھا، پروفیسر نے دیکھاوہ ایک مضبوط قد کاٹھ کاصحت مندنو جوان ہے۔انہوں

نو جوان سنتار ہا، میں نے عرض کیا" ہملٹن 50 برس کیپٹاؤن یونیورسٹی سے وابستہ رہا،ان

اسے جونیئر ڈاکٹر وں کوسکھانے کی ذمہ داری سونپ دی۔وہ اب

کی اصطلاحات سے ناواقف کیکن دنیا کے بڑے بڑے سرجنوں

جونيئر ڈاکٹروں کوآپریشن کی تکنیک سکھانے لگا۔وہ میڈیکل سائنس

ہے بہتر سرجن تھا۔ 1970 میں اس کی زندگی میں

تيسراموراآيا،اسسال جگرير تحقيق شروع هوئي تو

اس نے آپریشن کے دوران جگر کی ایک ایسی شریان

کی نشاند ہی کر دی جس کی وجہ سے جگر کی منتقلی

آسان ہوگئی۔اس کی اس نشاندہی نے میڈیکل

سائنس کے بڑے بڑے د ماغوں کو جیران کر دیا۔

آج جب دنیا کے سی کونے میں کسی شخص کے جگر کا

تواب براہ راست ہملٹن کوجا تاہے" میں خاموش

آیریشن ہوتا ہے تواس کے کامیاب آیریشن کا

50 برسوں میں اسے نے بھی چھٹی نہیں کی ۔وہ رات تین بجے گھر سے نکلتا، 14میل پیدل چاتا یو نیورٹی پہنچتا اورٹھیک 6 بج تھیٹر میں داخل ہوجاتا۔ان50 برسول میں اس نے بھی تنخواہ میں اضافے، طویل اوقات کاراور سہولتوں میں کمی کاشکوہ نہیں کیا۔ پھراس کی زندگی میں وہ وقت بھی آیا جب اس کی تنخواہ ومراعات یو نیور سٹی کے وائس جانسلر سے زیادہ ہو گئیں۔وہ میڈیکل ہسٹری کا پہلا اُن پڑھ سرجن تفاجس نے زندگی میں تیس ہزار سرجنوں کوٹریننگ دی،وہ 2005 میں فوت ہوا تواسے یو نیورٹی میں دفن کیا گیا"۔ میں رکااور نو جوان سے یو چھا"تم جانتے ہوا سے بہمقام کیسے حاصل ہوا "نوجوان خاموش ر ما، میں نے عرض کیا" صرف ایک ہاں ہے،جس دن اسے زرافے کی گردن پکڑنے کے لئے بلایا گیا تھا اگروہ اس دن انکار کردیتا که میں مالی ہوں میرا کام زرافوں کی گردنیں پکڑنا نہیں تو وہ مرتے دم تک مالی ہی رہتا نو جوان خاموش رہا، میں نے اس سے عرض کیا"ہم میں سے زیادہ تر لوگ زندگی بھر جاب تلاش کرتے رہتے ہیں جبکہ ہمیں کام نلاش کرنا چاہیے۔ ہملٹن اس راز کو یا گیا تھالہذااس نے جاب کی بجائے کام کوفوقیت دی یوں اس نے میڈیکل سائنس کی تاریخ بدل دی۔ ذراسو چوا گروہ سرجن کی جاب كيليِّ ايلائي كرتا تو كياوه سرجن بن سكتا تها؟" ميں ركااور بنس كر بولا "تم اس لئے بےروز گار ہو کہتم جاب تلاش کررہے ہو، کا منہیں،جس دن تم نے ہملٹن کی طرح کام شروع کیا تو تم بڑے اور کامیاب انسان بن جاؤ گے "۔ تحریر:عبدالشکورنو ہریو اپن اے کے ای ٹیل بیچ abdul.shakoor@ssgc.com.pk

نے اشارے سے اسے بلایا اوراسے زرافے کی گردن پکڑنے کا حکم وے دیا۔ ہملٹن نے گردن پکڑلی، یہ آپریشن آٹھ گھنٹے جاری رہا۔ اس دوران ڈاکٹر جائے اور کافی کے وقفے کرتے رہے کیکن ہملٹن زرافے کی گردن تھامے کھڑار ہا۔ آپریش ختم ہوا تووہ حیپ جاپ باہر نکلا اور جا کر گھاس کا ٹنا شروع کر دی۔ دوسرے دن پروفیسر نے اسے دوبارہ بلالیا، وہ آیا اورزرانے کی گردن پکڑ کرکھڑ اہو گیا،اس کے بعد بیاس کامعمول بن گیاوہ یو نیور ٹی آتا آٹھ دس گھنٹے آپریشن تھیٹر میں جانوروں کو پکڑتا اوراس کے بعد ٹینس کورٹ میں گھاس کا ٹیزلگتا، وہ کئی مہینے دو ہرا کا م کرتار ہااوراس نے اس ڈیوٹی کاکسی قتم کااضا فی معاوضه طلب کیا، نه ہی شکایت کی \_ پروفیسر رابرٹ جورُزنے اسکی استقامت سے متاثر ہوکراسے "لیب اسٹنٹ" بنادیا۔ ہملٹن کی پروموثن ہوگئی۔وہ اب یو نیورسٹی آتا ہتھیٹر پہنچتا اور سرجنوں کی مدد کرتا۔ بیسلسلہ برسوں جاری رہا۔1958 میں اس کی زندگی میں دوسراموڑ آیا۔ اِس سال ڈاکٹر برنارڈ یو نیورٹی آئے اورانہوں نے دل کی منتقلی کے آپریشن شروع کئے مملٹن اس کا اسشنٹ بن گیا، وہ ڈاکٹر برنارڈ کے کام کوغور سے دیکھا،ان آ پریشنول کے دوران وہ اسٹینٹ سے ایڈیشنل سرجن بن گیا۔ اب ڈاکٹرآ پریشن کرتے اور ٹا نکے لگانے کا فریضہ اسے سونپ دیتے ، وه انتهائي شاندار ٹانكے لگا تا، اسكى انگليوں ميں صفائى اور تيزى تقى، اس نے ایک ایک دن میں پچاس پچاس لوگوں کوٹا نکے لگائے۔وہ سرجنوں سے زیادہ انسانی جسم کوسمجھنے لگا چنانچہ بڑے ڈاکٹروں نے

## SSGOA کی جانب سے جج اور یا تراکی قرعداندازی

سمپنی آفیسرز کے لئے22 جون 2010 کو جج اوریار ای قرعه اندازی کاانعقاد کیا گیا۔ مپنی منیجنٹ کی جانب سے قرعه نکال کرکامیاب خوش نصیب امیدواروں کے ناموں کا اعلان کیا گیا۔ قرعه اندازی کے وقت ہال سوئی سدرن گیس کمپنی کے ملاز مین سے مکمل طور پر جرا ہوا تھا۔ سلیم عباس جیلانی، چيئر مين، ڈاکٹر فيض الله عباسي، ايم ڈي، زوہيرصد لقي، ايس جي ايم (ايم ايس)، شوکت بلوچ، اے

## سيايس آرجي تحت سوئي سدرن گئس پاران MoUs تي صحيح

سوئي سدرن گئس ڪمپني سنڌ ۽ بلوچستان ۾ بنيادي سطح تي تعليم جي فراهمي لاءِ وڌ مان وڌ وسيلا فراهم ڪرڻ لاءِ هر وقت ڪوشان آهي تہ جيئن هيٺئين سطح تي سماجي ۽ معاشي ترقي ممڪن بڻائي سگهجي. ان عزم جو اظهار سوئي سدرن گئس ڪمپني جي ارپوريٽ سوشل بالله عباسي ڪمپني جي ڪارپوريٽ سوشل رسپونسبلٽي جي تحت تعليم، صحت ۽ ماحول جي شعبن ۾ ميري ايڊيليڊلپروسي سينٽر (MALC) جي باليو ڊبليو ايف پاڪستان، انڊس ريسورس سينٽر (IRC) ۽ دي سٽيزنز فائونڊيشن (TCF) جي نمائندن سان گڏيل ٺاه جي ياداشتن تي صحيح لاءِ منقعد ڪيل تقريب کي خطاب ڪندي ڪئي، ڊويزن جي

اڳواڻ زوهير صديقي, ايسجي ايم (ايم ايس) ۽ نسرين حسين, ڊي جي ايم (سي سي ڊي) به ان موقعي تي اسٽيج تي موجود هئي.ايم ڊي چيو ته ڪمپني انهن غير سركاري تنظيمن ۽ سماجي ادارن جو معاشي سهكار جاري رکندي، جن جو عزم سنڌ ۽ بلوچستان جي پٺتي پيل ماڻهن کي خودمختيار بڻائڻ آهي, جيڪي گئس ٽرانسميشن ۽ ڊسٽري بيوشن لاءِ سوئي سدرن گئس كميني جافرنچائزعلائقا آهن.ڊاكٽر فيض الله عباسي چيو تہ کين MALC جهڙن پارٽنرز سان گڏ ڪم ڪرڻ تي فخر آهي جيڪي اڪيلي سر ملڪ مان جذام

جي سؤسيڪڙي خاتمي لاءِ مصروف عمل آهن. ان کان اڳ ايم ڊي صادقہ صلاح الدين, ايگزيڪيٽو ڊائريڪٽر, IRC شكيل احمد سي اي او MALC اسد ايوب احمد، مهراڻ يونيورسٽي آف انجنيئرنگ اينڊ ٽيڪنالاجي سي سي او TCF ۽ ڊاڪٽر غلام اڪبر، ڊائريڪٽر، WWF پاڪستان ساڻ گڏيل ٺاهن جي ياداشتن تي صحيح ڪيون.صحت جي شعبي ۾ MALC سان گڏ صحيح كيل MoU جي تحت سوئي سدرن گئس كمپني چار سال لاءِ ميرپورخاص ۾ واقع ترپل مرجر سينٽر (ٽيايم سي)کي فعل رکڻ لاءِ فنڊ فراهم ڪندي جڏهن تہ TCF سان گڏ صحيح ڪيل ٺاهہ جي تحت گرين لرن اين فن پروگرام, سامونڊي ڪناري جي صفائي ۽اسڪول آئوٽ ريچ پرو گرام جا خرچ فراهم ڪيا ويندا IRC سان گ صحیح کیل ٺاهہ تحت IRC هائوس آف لرننگ, گرلز ايليمينٽري اسڪول, ڄامشورو, لاءِ فنڊ فراهر ڪيا ويندا. ان موقعي تي ايم ڊي سمورن گڏيل پارٽنرز کي سرٽيفڪيٽ آفپارٽنرشپس ورهيا. سمورن نمائندن MoU تي صحيح ڪرڻ کان پهرين حاضرين کي واسطيدارن ادارن جي باري ۾ آگاهي فراهم

ڪئي. هننچيو ته نياڻين جي تعليم انهيءَ لاءِ توجهم جو مركز آهي ته جيئن اسان جي معاشري ۾ نياڻيون پڙهي لکي پنهنجو مقام حاصل ڪري سگهن. انهن نمائندن جالايل تقريب جي انتهائي پيشيوراڻي طريقي سان اهتمام ڪرڻ دوران ٺاهن تي پهچڻ لاءِ سمورين ڪوششن تي سي سي ڊي جي تيم جي خدمتن کي خاص طور تي ساراهيو. ان کان اڳ آجياڻي خطاب ڪندينسرين حسين, ڊي جي ايم (سي سي ڊي) چيو تہ سوئي سدرن گئس ڪمپني جلد ئي مختلف مضمونن ۾ اهليت ركڻ وارن شاگردن كي اسكالرشپ فراهم كرڻ لاءِ ملك جي چئن انتهائي اعليٰ ادارنسان گڏ MoU تي صحيح ڪندي, جن ۾ قائد عوام يونيورسٽي آف انجنيئرنگ, سائنس اينڊ تيڪنالاجي, نوابشاه, ڄامشورو، LUMS۽ BA ڪراچي شامل آهن.

انكان پوءِ سدّسماءُ جي ذريعن جي نمائندن سان ڳالهيون ڪندي ايم ڊي چيو تہ ماضي ۾ هڪ پروفيسر هئڻ جي حيثيت ۾ سندس دل گهري ٿو تہ خانوت ۽ ڊيره مراد جمالي جهڙن تيل پيل علائقن ۾ وڃي تدريس جا فرض انجام ڏيان. تهن چيو ته سدائين ان ڳالهه جي حمايت ڪئي آهي يونيورستيجياستادن پرائمرياسكول وڃيجيكي حقيقت ۾ اسان جي تعليمي نظام ۾ چيلھ جي هڏي جي حيثيت رکندا آهن. ڪمپني جي سينئر مئنجمينٽ جن ۾ شاملعظيم اقبال صديقي, ڊي ايم ڊي (سي اينڊ ايف ايس) سيد حسن نواب, ڊي ايم ڊي (او اينڊ پي). راحت كمال صديقي, ايس جي ايم (اي ايس). شوكت بلوچ, اي ايس جي ايم (تي) زاهد ممتاز, ايايسجيايم (سيايس) شاهدايچ جعفري, سيايف او. يوسف جي انصاري, كمپني سيكريٽري ۽ عرفان ظفر, سي تي آئي او کانسواءِ جنرل مئنيجر ۽ ڊپٽي جنرل مئنيجر بہان موقعي تي موجود هئا.

## سي سي ڊي ٽيم جو SUIT جو دورو

ڊي جي ايم نسرين حسين جي اڳواڻي ۾ سي سي ڊي ٽيم سنڌ انسٽيٽيوٽ آف يورولوجي اينڊ ٽرانسپلانٽيشن (SUIT) جو دورو ڪيو. SUIT جو ڳاڻيٽو پاڪستان جي وڏي پبلڪ سيڪٽر هيلٿ آر گنائيزيشن ۾ ڪيو ويندو آهي, جيڪو هر خاص ۽ عام کي گردي جي بيمارين ۽ ٽرانسپلانٽيشن جي حوالي سان انتهائي جديد طبي سهولتون بلڪل مفت فراهر ڪري رهيو آهي سي سي ڊي ٽيم پاران ڪيل اهو دورو سيايس آر پروگرام جو حصو هو, جنهن تحت SUIT ۾ هڪ ڏينهن جي ڊائلسس جا خرچ سوئي سدرن گئس ڪمپني برداشت ڪندي, جنهن جي ڪري اٽڪل 650 مريضن کي ڊائلسس بلڪل مفت سرانجام ڏني وئي ۽ ٽرانسپلانٽيشن جي مريضن کي مفت دوائون فراهم ڪيو ويون.

سيسيڊي ٽيم SUIT جي ريسورس جنريشن ۽ آئوٽ ريچ آفيسر ليلاجميل سان گذانسٽيٽيوٽجي مختلف شعبن جو دورو ڪيو. ان موقعي تي تيم ڊائلسس وارڊ ۾ علاج هيٺ ٻارڙن سان بہ ملاقات ڪئي ننڍي ڄمار ۾ انهن معصوم ٻارڙن جي تڪليف پوري ٽيم لاءِ رنجائيندڙ هئي. جيتوڻيڪ جڏهن سي سي ڊي جي تيم ٻارن ۾ گفٽ بيگ ورهايا تہ سمورن ٻارڙن جي چهرن تي خوشي وچان سچي مُرڪ ڏسڻ ۾ آئي ان کانپوءِ تیم کي SUIT آڊيٽوريم آندو ويو. جتي اداري جي بريفنگ کانپوءِ سڄي ٽيم جو گروپ فوٽو ورتو ويو. دوري جي پڄاڻي تي سي سي ڊي ٽيم SUIT جي ڊاڪٽر الطاف کي 0.95 ملين روپين جو چيڪ ڏنو. ڊاڪٽر الطاف ٽيم کي ٻڌايو تہ SUIT ۾ ايندڙ گھڻي ڀاڱي مريضن جو تعلق ٻهراڙي يا پوءِ غريب شهري علائقن مان هوندو آهي, جن جي حقيقت ۾ طبي سهولتن تائين رسائي ناهي ٿيندي هن وڌيڪ چيو ته ڊائلسس مشين هفتي ۾ ست ڏينهن چوويھ ڪلاڪ ڪم ڪندي آهي۽ هن کي صرف انهي وقت هٽايو ويندو آهي جڏهن هن کي بدلڻو پوي ڊيجيايم (سيسيڊي) انتهائي جديدمشينن سان گڏعلاج جون سهولتون بلكل مفت فراهم كرڻ تي SUIT جي مشن كي خاص طور تىساراھيو.

## حيدرآبادريجنلآفيسمهنگامي صورتحال كي منهن ڏيڻ لاءِ تربيتي مشق جو انعقاد

ملڪ ۾ دهشتگردي جي واقعن کان ڪير متاثر ناهي پر هڪ بهادر قوم جي حيثيت سان اسان لوهي ڀت وانگر انهن مجرماڻين ڪارروائين جو مقابلو ڪري رهيا آهيون ريجنل آفيس حيدر آباد ۾ جيڪا سوئي سدرن گئس ڪمپني جي ڪراچي ۾ واقع هيڊ آفيس کانپوءِ ٻي سڀني کان وڏي اسٽيبلشمينٽ جو درجو رکي ٿي، آفيسرن ۽ ملازمن کي ايمر جنسي جي صور تحال کي منهن ڏيڻ لاءِ 2 جون 2010 تي هڪ تربيتي مشق جو اهتمام ڪيو ويو، مشق جو آغاز ٿيندي ئي سمورا آفيسر، اسٽاف, مزدور ۽ ملاقات ڪندڙ هو ترز و ڄندي ئي اسيمبلي ايريا جو رُخ ڪيو. ان

ويو. مشق دوران بن ڪلوميٽرن تي واقع ميڊيڪل سينٽر کان ايمبولينس کي به طلب ڪيو ويو. جيڪا پنج منٽ ۾ ريجنل آفيس پهچي وئي آفيس ۾ واقع سمورن بلاڪس کي صرف چار منٽ ۽ ڏه سيڪنڊن ۾ خالي ڪرايو ويو.

مشق تي عملدرآمد كان اڳ ڀرپاسي ۾ رهندڙن كي آگاه، ڪيو ويو هو ته جيئن اهي الارم وڄڻ جي صورت ۾ پريشان نہ ٿين عبدالراشد خانزاده، ريجنل مئنيجر (حيدرآباد) ۽ ليڊ مئنيجر عبدالوهاب صديقي، سي ايم (ايڊمن) ۽ اسسٽنٽ ليڊ مئنيجر فلائيٽ ليفٽيننٽ (ر) اڪرام چوڌري،

دوران حفاظتي ڪيپ پهري ايمرجنسي ريسپونڊرز پهچي لاڳاپيلُ علائقن جي چڱي ريت چڪاس ڪئي تہ هتي ڪو رهجي تہ نہ ويو آهي. جنهن کانپوءِ ايمرجنسي اسيمبلي ايريا ۾ بيٺل سمورن آفيسرن جي ڳڻپ ڪئي ان موقعي تي باهہ وسائڻ جي آلن جو عملي مظاهرو پڻ ڪيو انچارج سيڪيور ٽي ۽ سائيٽ ايمرجنسي ڪنٽرولر ۽

سيد غضنفر علي شاه ايساي (سيفٽي، HSE) ۽ مونيٽر / ڪو آرڊينيٽر تي ٻڌل تربيتي مشق جي ٽيم ان ڊرل کي انجام ڏيڻ ۾ سهڪار ڪيو ڊرل ۾ موجود شرڪت ڪندڙ ايندڙ مشق کي تن منٽن ۾ پورو ڪرڻ جي عزم جو اظهار ڪيو.

تورن سان: انجنيئر نديم قريشي, انچارج (HSE اندرئين سنڌ)
