## Corrosion Control Department

### TECHNICAL SPECIFICATIONS

#### Ladder 14 feet Aluminium Alloy

SPECS-11-25

REVISION: 00

DATE: 21-10-2025

### 1. General Description

A lightweight, foldable/adjustable ladder made of high-strength Aluminium alloy, designed for field applications. The ladder offers excellent durability, corrosion resistance, and easy handling, with a secure locking mechanism for stability during use.

### 2. Specific Requirements

Parameter	Specification
Type	Foldable/adjustable
Total Height (open position)	14 feet
Material	Aluminium alloy
Load bearing Capacity	Minimum 120 kg
Material Thickness	As per standard
Warranty	01 year

### 3. General Requirements

- Rust and corrosion resistant.
- Easy to fold and transport.
- Anti-slip rubber shoes provide stability on various surfaces.
- Suitable for maintenance, construction, and field applications.
