

3 Core Communication Cable Technical Specification

Cable Type:

- 3 core communication cable

2. Conductor:

- Size: 18 AWG (American Wire Gauge)
- Material: Stranded copper conductor

3. Insulation:

- Material: Polyvinyl Chloride (PVC)
- Core insulation: Individually insulated cores with PVC

4. Overall Construction:

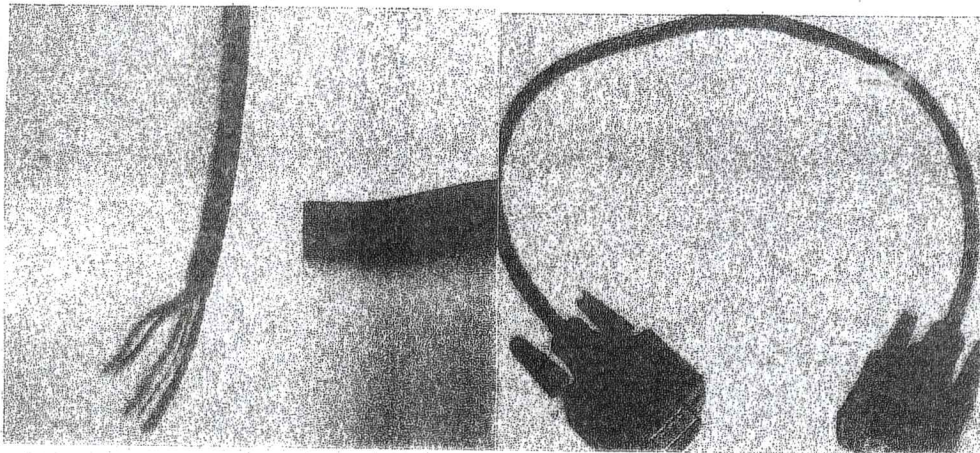

- Number of cores: 3
- Outer sheath: PVC jacket
- Coil length: 90 meters per coil

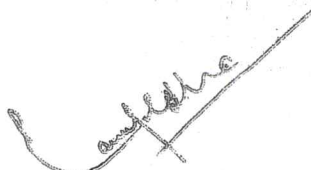

5. Electrical Rating:

- Voltage rating: Typically up to 300V

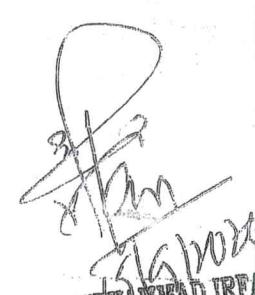

6. Physical Properties:

- Flexible and durable for communication wiring Color-coded cores for easy identification (standard colors i.e., Red/Black/Yellow)
