Spares for Measuring Unit Assembly Line-Gluing Machine

Handheld Programming Pendant for G-4 (V3) Gluing Machine – Requisition No. 681673

The bidder must be duly registered with NTN and GST.

Bidders are required to visit the site prior to submission of their bids to fully understand the operational requirements and ensure compatibility of the offered pendant with the existing G-4 (V3) Gluing Machine and the supplied 4-Axis Motion / Drive Controller.

A facility visit to the bidder's premises may also be conducted to assess the bidder's technical capabilities and the availability of adequate installation, troubleshooting, repair, and after-sales support facilities.

The bidder must possess a valid Pakistan Engineering Council (PEC) registration, where applicable.

If the bidder is not the Original Equipment Manufacturer (OEM) of the offered pendant, the bidder shall provide a valid OEM Authorization Certificate.

The bidder must have successfully completed at least five (05) similar projects involving motion control, CNC, dispensing, gluing, or related industrial automation systems. Documentary evidence of such projects shall be submitted with the bid.

The bidder shall submit a realistic work plan and implementation schedule demonstrating that the complete installation, integration, testing, and commissioning can be completed within seven (07) days.

All supplied items shall be brand new, unused, of the latest available manufacturing batch, and free from defects in material and workmanship.

The Handheld Programming Pendant shall fully comply with the attached technical specifications and shall be compatible with the supplied 4-Axis Motion / Drive Controller and the existing G-4 (V3) Gluing Machine. The pendant shall support all specified functions, including G-Code programming, manual axis jogging, teach mode, program storage, and other required operational functions.

SSGC | Sui Southern Gas Company Limited

The pendant shall be supplied complete with all necessary accessories, cables, connectors, communication interfaces, and mounting/connection hardware, as required for proper installation and operation, unless otherwise specified in the technical specifications.

The supplied item shall be properly packed using suitable protective materials to prevent damage during transportation, handling, and storage.

Each package shall be clearly labeled with the item name, quantity, manufacturer's details, and relevant Purchase Order (PO) number to ensure proper identification and traceability.

Any item found defective, damaged, non-compliant with the specified requirements, or unsuitable during inspection, installation, testing, or commissioning shall be rejected. The supplier shall replace such items with compliant items at their own cost within the stipulated period, without adversely affecting the ongoing operations of the plant.

The supplier shall be responsible for the installation, integration, testing, and commissioning of the pendant with the existing G-4 (V3) Gluing Machine and supplied 4-Axis Motion / Drive Controller. The system shall be handed over in fully operational working condition upon successful commissioning.

Any necessary configuration, programming, parameter setting, or adjustment required to ensure proper communication and functionality of the pendant with the controller and machine shall be carried out by the supplier at no additional cost, within the approved scope and technical requirements.
