Important Notes :

*Calculated capacities of Supply Mains i.e. downstream of SMSs may change depending upon location and demand of customers. For modification/extension/expansion of network will be required to bear the cost (including allied cost) to meet capacity requirements as per Rule4 (k) of TPA Rules, 2018 provided it is technically/operationally feasible for the C for transportation service at any specific location based on available (spare) Capacity on Supply Mains of Distribution System will be evaluated by the Transporter on case to case view the system operational constraints, system integrity, location and time of the year in line with provisions of Schedule II of TPA Rules, 2018 and Appendix E (Capacity Allocation of Pakistan Gas Network Code).

*The available (spare) capacities in Supply Mains of Distribution System will be offered to shipper on 'Interruptible Basis.

*Total available capacity in Supply mains of distribution system will depend upon the total available capacity in relevant segment of transmission network.
