## Notes to the Unconsolidated Financial Statements

### For the year ended 30 June 2009

#### 1. STATUS AND NATURE OF BUSINESS

Sui Southern Gas Company Limited ("the Company") is a public limited company incorporated in Pakistan and is listed on the Karachi, Lahore and Islamabad Stock Exchanges. The main activity of the Company is transmission and distribution of natural gas in Sindh and Balochistan. The Company is also engaged in certain activities related to the gas business including the manufacturing and sale of gas meters and construction contracts for laying of pipelines.

#### 2. **BASIS FOR PREPARATION**

#### 2.1 Statement of compliance

These unconsolidated financial statements ("the financial statements") have been prepared in accordance with approved accounting standards as applicable in Pakistan. Approved accounting standards comprise of such International Financial Reporting Standards (IFRSs) issued by the International Accounting Standards Board as are notified under the Companies Ordinance, 1984, provisions of and directives issued under the Companies Ordinance, 1984. In case requirements differ, the provisions of, or directives issued under the Companies Ordinance, 1984 shall prevail.

#### 2.2 Basis of measurement

These financial statements have been prepared under the historical cost convention, except for certain investments stated in note 18 which are carried at their fair values.

#### 2.3 Functional and presentation currency

The financial statements are presented in Pakistani Rupees, which is the Company's functional and presentation currency.

#### 2.4 Use of estimates and judgements

The preparation of financial statements in conformity with approved accounting standards, as applicable in Pakistan, requires the management to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expenses. Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including reasonable expectation of future events. Revision to accounting estimates are recognised prospectively commencing from the period of revision.

Judgements and estimates made by management that may have a significant risk of material adjustments to the financial statements in the subsequent year are discussed in note 47.

#### 2.5 Initial Application of a standard or an Interpretation

The following standards, amendments and interpretations become effective during the current year

IFRS 7 - Financial Instruments: Disclosures (effective for annual periods beginning on or after 28 April 2008) supersedes IAS 30 - Disclosures in the Financial Statements of Banks and Similar Financial Institutions and the disclosure requirements of IAS 32 - Financial Instruments: Disclosure and Presentation. The application of the standard is not expected to have significant impact on the Company's financial statements other than increase in disclosures.

IAS 29 - Financial Reporting in Hyperinflationary Economies (effective for annual periods beginning on or after 28 April 2008). The Company does not have any operations in Hyperinflationary Economies and therefore the application of the standard is not likely to have an effect on the Company's financial statements.

IFRIC13 - Customer Loyalty Programmes (effective for annual periods beginning on or after 01 July 2008) addresses the accounting by entities that operate or otherwise participate in customer loyalty programmes under which the customer can redeem credits for awards such as free or discounted goods or services. The application of IFRIC 13 is not likely to have an effect on the Company's financial statements.

IFRIC 14 IAS 19 - The Limit on Defined Benefit Asset, Minimum Funding Requirements and their interaction (effective for annual periods beginning on or after 1 January 2008). IFRIC 14 clarifies when refunds or reductions in future contributions in relation to defined benefit assets should be regarded as available and provides guidance on minimum funding requirements (MFR) for such asset. The interpretation has no effect on Company's financial statements for the year ended 30 June 2009.

### Standards, Interpretations and Amendments not yet effective

The following standards, interpretations and amendments of approved accounting standards are effective for accounting periods beginning from the dates specified below. These standards are either not relevant to the Company's operations or are not expected to have significant impact on the Company's financial statements other than increase in disclosures in certain cases:

Revised IAS 1 - Presentation of financial statements (effective for annual periods beginning on or after 1 January 2009) introduces the term total comprehensive income, which represents changes in equity during a period other than those changes resulting from transactions with owners in their capacity as owners. Total comprehensive income may be presented in either a single statement of comprehensive income (effectively combining both the income statement and all non-owner changes in equity in a single statement), or in an income statement and a separate statement of comprehensive income.

Revised IAS 23 - Borrowing costs effective for annual periods beginning on or after 1 January 2009) removes the option to expense borrowing costs and requires that an entity capitalise borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset.

IAS 27 - Consolidated and separate financial statements' effective for annual periods beginning on or after 1 January 2009). The amendment removes the definition of the cost method from IAS 27 and replaces it with a requirement to present dividends as income in the separate financial statements of the investor.

Amended IAS 27 - Consolidated and Separate Financial Statements (effective for annual periods beginning on or after 1 July 2009) requires accounting for changes in ownership interest by the group in a subsidiary, while maintaining control, to be recognised as an equity transaction. When the group loses control of subsidiary, any interest retained in the former a subsidiary will be measured at fair value with gain or loss recognised in the profit or loss.

Amendment to IAS 32 - Financial Instruments: Presentation and IAS - Presentation of Financial Statements (effective for annual periods beginning on or after 1 January 2009) - Puttable Financial Instruments and Obligations Arising on Liquidation requires puttable instruments, and instruments that impose on the entity an obligation to deliver to another party pro rata share of the net assets of the entity only on liquidation, to be classified as equity if certain conditions are met.

Amendments to IAS 39 and IFRIC 9 - Embedded derivatives (effective for annual periods beginning on or after 1 January 2009). Amendments require entities to assess whether they need to separate an embedded derivative from a hybrid (combined) financial instrument when financial assets are reclassified out of the fair value.

Amendments to IAS 39 - Financial Instruments: Recognition and measurement - Eligible hedged items (effective for annual periods beginning on or after 1 July 2009) clarifies the application of existing principles that determine whether specific risks or portions of cash flows are eligible for designation in a hedging relationship.

Amendment to IFRS 2 - Share-based Payment - Vesting Conditions and Cancellations (effective for annual periods beginning on or after 1 January 2009) clarifies the definition of vesting conditions, introduces the concept of non-vesting conditions, requires non-vesting conditions to be reflected in grant-date fair value and provides the accounting treatment for non-vesting conditions and cancellations.

Amendment to IFRS 2 - Share-based Payment - Group Cash-settled Share-based Payment Transactions (effective for annual periods beginning on or after 1 January 2010). Currently effective IFRSs requires attribution of group share-based payment transactions only if they are equity-settled. The amendments resolve diversity in practice regarding attribution of cash-settled share-based payment transactions and require an entity receiving goods or services in either an equity-settled or a cash-settled payment transaction to account for the transaction in its separate or individual financial statements.

Revised IFRS 3 - Business Combinations (applicable for annual periods beginning on or after 1 July 2009) broadens among other things the definition of business resulting in more acquisitions being treated as business combinations, contingent considerations to be measured at fair value, transaction costs other than share and debt issue costs to be expensed, any pre-existing interest in an acquiree to be measured at fair value, with the related gain or loss recognised in profit or loss and any non-controlling (minority) interest to be measured at either fair value, or at its proportionate interests in identifiable assets and liabilities of an acquiree, on a transaction-by-transaction basis.

IFRS 4 - Insurance Contracts (effective for annual periods beginning on or after 1 January 2009). The IFRS makes limited improvements to accounting for insurance contracts until the Board completes the second phase of its project on insurance contracts. The standard also requires the entity issuing insurance contracts (an insurer) to disclose information about those contracts.

Amendment to IFRS 7 - Improving disclosures about Financial Instruments (effective for annual periods beginning on or after 1 January 2009). These amendments have been made to bring the disclosure requirements of IFRS 7 more closely in line with US standards. The amendments introduce a three-level hierarchy for fair value measurement disclosures and require entities to provide additional disclosures about the relative reliability of fair value measurements.

IFRS 8 - Operating segments (effective for annual periods beginning on or after 1 January 2009) introduces the "management approach" to segment reporting. IFRS 8 will require a change in presentation and disclosure of segment information based on the internal reports that are regularly reviewed by the Company's "chief operating decision maker" in order to assess each segment's performance and to allocate resources to them. Currently the Company presents segment information in respect of its business segments.

IFRIC 15 - Agreement for Construction of Real Estate (effective for annual periods beginning on or after 1 October 2009) clarifies the recognition of revenues by real estate developers for sale of units, such as apartments or houses, 'off-plan', that is, before construction is complete.

IFRIC 16 - Hedge of Net Investment in a Foreign Operation (effective for annual periods beginning on or after 1 October 2008) clarifies that net investment hedging can be applied only to foreign exchange differences arising between the functional currency of a foreign operation and the parent entity's functional currency and only in an amount equal to or less than the net assets of the foreign operation, the hedging instrument may be held by any entity within the group except the foreign operation that is being hedged and that on disposal of a hedged operation, the cumulative gain or loss on the hedging instrument that was determined to be effective is reclassified to profit or loss. The Interpretation allows an entity that uses the step-by-step method of consolidation an accounting policy choice to determine the cumulative currency translation adjustment that is reclassified to profit or loss on disposal of a net investment as if the direct method of consolidation had been used.

IFRIC17 - Distributions of Non-cash Assets to Owners (effective annual periods beginning on or after 1 July 2009) states that when a company distributes non cash assets to its shareholders as dividend, the liability for the dividend is measured at fair value. If there are subsequent changes in the fair value before the liability is discharged, this is recognised in equity. When the non cash asset is distributed, the difference between the carrying amount and fair value is recognised in the income statement.

IFRIC 18 - Transfers of Assets from Customers (to be applied prospectively to transfers of assets from customers received on or after 01 July 2009). This interpretation clarifies the requirements of IFRSs for agreements in which an entity receives from a customer an item of property, plant, and equipment that the entity must then use either to connect the customer to a network or to provide the customer with ongoing access to a supply of goods or services (such as a supply of electricity, gas or water).

#### 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### 3.1 Property, plant and equipment

### **Initial Recognition**

The cost of an item of property plant and equipment is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the entity and the cost of such item can be measured reliably.

Recognition of the cost in the carrying amount of an item of property plant and equipment ceases when the items is in the location and condition necessary for it to be capable of operating in the manner intended by the management.

#### 3.1.1 Measurement

Property, plant and equipment except freehold land, leasehold land and capital work in progress are stated at cost less accumulated depreciation and impairment, if any. Freehold land and leasehold land are stated at cost, less impairment loss, if any.

The cost of the property plant and equipment includes:

- (a) its purchase price including import duties, non refundable purchase taxes after deducting trade discounts and rebates; and
- (b) any cost directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

#### 3.1.2 Subsequent expenditure (including normal repairs and maintenance)

Expenditure incurred to replace a component of an item of operating assets is capitalised and the asset so replaced is retired. Other subsequent expenditure is capitalised only when it is probable that future economic benefits associated with the item will flow to the entity and the cost of the items can be measured reliably. All other expenditure (including repairs and normal maintenance) is recognized in the unconsolidated profit and loss account as an expense when it is incurred.

### 3.1.3 Capital work in progress

Capital work in progress is stated at cost less impairment, if any. The cost consists of expenditure incurred and advances made in the course of their construction and installation. Transfers are made to relevant asset category as and when assets are available for intended use.

#### 3.1.4 Depreciation

Depreciation on assets is calculated so as to depreciate the assets over their estimated useful lives under the straight-line method.

Compressors and transmission lines

Depreciation on compressors and transmission lines is charged from the dates these projects are available for intended use up to the date these are disposed of.

Other operating assets

Depreciable value of operating assets other than compressors and transmission lines is depreciated over their estimated service life from the month the assets are available for use in service till the month they are disposed of or fully depreciated, except for assets sold to employees under the service rules, in which case, depreciation is charged until the date of disposal.

### 3.1.4.1 Useful lives of the assets is mentioned in the notes 16.2 to 16.5 to these financial statements.

### 3.1.5 Intangible assets

An intangible asset is recognised as an asset if it is probable that future economic benefits attributable to the asset will flow to the entity and the cost of such asset can be measured reliably.

### Indefinite life

Intangible assets with an indefinite useful life, if any, are not amortised. Such intangible assets are tested for impairment annually and whenever there is indication that such intangible asset may be impaired. Useful life of such assets is reviewed at least annually to determine whether events and conditions continue to support an indefinite useful life assessment for such assets. If not, the change in useful life assessment from indefinite to definite is accounted for as a change in accounting estimate.

### Definite life

Intangible assets are measured initially at cost and subsequently stated at cost less accumulated amortisation and impairment losses, if any.

The depreciable amount of intangible asset with a finite useful life is amortised on a straight line basis over its useful life. Amortisation begins when the assets is available for use and ceases when the asset is derecognised. Amortisation charge is recognised in the unconsolidated profit and loss account.

The amortisation period for intangible assets with a finite useful life is reviewed at each year end and is changed to reflect the useful life expected at respective year end.

#### 3.1.6 Borrowing costs

Borrowing costs incurred on long term finances attributable for the construction of qualifying assets are capitalised up to the date the respective assets are available for the intended use. All other mark-up, interest and other related charges are taken to the unconsolidated profit and loss account currently.

### 3.1.7 Gains and losses on disposal

Gains and losses on disposal are taken to the unconsolidated profit and loss account currently.

#### 3.1.8 Leased assets

Leased assets in terms of which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Assets acquired by way of finance lease are stated at an amount equal to the lower of its fair value and the present value of minimum lease payments at the inception of the lease, less accumulated depreciation and impairment losses, if any. Depreciation on assets subject to finance lease is recognized in the same manner as for owned operating assets.

#### 3.2 Investments

### Available-for-sale

Investments which are intended to be held for an indefinite period and may be sold in response to the need for liquidity or changes in interest rates are classified as available for sale investments. These investments are initially recognised at fair value, being the cost of the consideration given. After initial recognition, investments classified as available for sale are re-measured at fair value, determined with reference to the year-end quoted rates. Gains or losses on re-measurement of these investments are recognised directly in equity until the investment is sold, collected or otherwise disposed of, or until the investment is determined to be impaired, at which time the cumulative gain or loss previously reported in equity is included in unconsolidated profit and loss account. Impairment loss recognised in unconsolidated profit and loss account is not reversed through unconsolidated profit and loss account subsequently.

### Held to maturity

Investments with fixed or determinable maturity where management has both the positive intent and ability to hold till maturity are classified as held-to-maturity. These investments are measured initially at its fair value plus transaction costs that are directly attributable to these investments. Subsequent to initial measurements, held to maturity investments are measured at amortised cost. Provision for impairment in value, if any, is taken to income. Impairment has recognised in unconsolidated profit and loss account is not reversed through unconsolidated profit and loss account subsequently.

### Date of recognition

All purchases and sales of investments that require delivery within the time frame established by regulations or market convention (regular way) are recognised at the trade date. Trade date is the date on which the Company commits to purchase or sell the investments.

### Derecognition

All investments are de-recognised when the rights to receive cash flows from the investments have expired or have been transferred and the Company has transferred substantially all risk and rewards of ownership.

#### 3.3 Net investment in finance lease

Contractual arrangements, the fulfilment of which is dependent upon the use of a specific asset and whereby the right to use the underlying asset is conveyed to the customer, are classified as finance lease. Net investment in finance lease is recognised at an amount equal to the present value of the lease payments receivable, including any guaranteed residual value determined at the inception of lease. Discount rate used in the calculation of the present value of minimum lease payments is the interest rate implicit in the lease. Any recoveries from consumers in respect of the service cost and contingent rent are excluded from the minimum lease payments and are recorded as recoveries of transmission and distribution cost from the lessee and gas transportation income respectively. Interest income from net investment in finance lease is recognised on a pattern reflecting a constant periodic return on Company's net investment in finance lease.

#### 3.4 Stores, spares and loose tools

These are valued at lower of cost and net realisable value less impairment loss, if any. Cost is determined under the moving average basis. Goods-in-transit are valued at lower of cost incurred up to the unconsolidated balance sheet date and net realisable value less impairment loss, if any.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

#### 3.5 Stock-in-trade

### Gas in pipelines

Stock of gas in transmission pipelines is valued at the lower of cost, determined on weighted average basis, and net realisable value less impairment loss, if any.

### Meter manufacturing division

Components (materials) are valued at lower of moving average cost and net realisable value less impairment loss, if any. Work- inprocess includes the cost of components only (determined on a moving average basis). Finished goods are stated at the lower of cost determined on an average basis and net realisable value and includes appropriate portion of labour and production overheads.

Components in transit are stated at cost incurred up to the unconsolidated balance sheet date less impairment losses, if any.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

#### 3.6 Trade debts and other receivables

Trade debts and other receivables are recognised initially at fair value and subsequently measured at amortised cost less provision for impairment, if any. A provision for impairment is established when there is an objective evidence that the Company will not be able to collect all amounts due according to the original terms of receivables. Trade debts and other receivables considered irrecoverable are written off.

#### 3.7 Trade and other payables

Trade and other payables are stated at cost which is the fair value of the consideration to be paid in the future for goods and services received, whether or not billed to the Company.

#### 3.8 Mark-up bearing borrowings

### Long term financing

Mark-up bearing borrowings are recognized initially at fair value which is usually the cost, less attributable transaction costs. Subsequent to initial recognition, mark-up bearing borrowings are stated at amortised cost, while the difference between the cost (reduced for periodic payments) and redemption value is recognized in the unconsolidated profit and loss account over the period of the borrowings.

Long term loans received from Government of Sindh with interest rate lower than prevailing market interest rates for a similar instruments are initially measured at fair value. The fair value is estimated at the present value of all future cash payments discounted using the prevailing market rate of interest for a similar instrument with a similar credit rating. Difference between the fair value and the proceed received is treated as government grant and is amortised over the useful life of related asset constructed.

#### Leases

The Company accounts for lease obligations by recording the asset and the corresponding liability determined on the basis of discounted value of minimum lease payments. Financial charges are recognized in the unconsolidated profit and loss account using the effective mark-up rate method.

#### 3.9 **Provisions**

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.

#### Deferred credit 3.10

Amounts received from customers and the Government as contributions and grants for providing service connections, extension of gas mains, laying of distribution lines, etc. are deferred and recognized in the unconsolidated profit and loss account over the useful lives of the related assets starting from the commissioning of such asset.

#### 3.11 **Taxation**

### Current

Provision for current taxation is based on taxable income at the current rates of taxation, after taking into account the available tax credits and rebates.

### Deferred

Deferred tax is recognised using balance sheet liability method, providing for temporary difference between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax provided is based on the expected manner of realisation or settlement of the carrying amount of assets and liabilities, using the tax rates enacted or substantively enacted at the balance sheet date.

The Company recognises a deferred tax asset to the extent that it is probable that taxable profits for the foreseeable future will be available against which the assets can be utilised. Deferred tax assets are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

#### 3.12 Revenue recognition

- Revenue from gas sales is recognized on the basis of gas supplied to customers at rates periodically announced by the Oil and Gas Regulatory Authority (OGRA).
- Meter rental income is recognized monthly at specified rates for various categories of customers.
- Revenue from sale of meters and gas condensate is recognized on dispatch to the customers.
- Deferred credit is amortised and related income is recognised in the unconsolidated profit and loss account over the useful lives of related assets.
- Dividend income on equity investments is recognized when right to receive the payment is established.
- Profit on term deposits and royalty income are recognized on time proportion basis.
- Late payment surcharge is recognized from the date the billed amount is overdue.
- Under the provisions of license given by OGRA, the Company is required to earn a minimum annual return before taxation of 17% per annum of the net average operating fixed assets (net of deferred credit) for the year, excluding financial and other non operating charges and non operating income. The determination of annual required return is reviewed by OGRA under the terms of the license for transmission, distribution and sale of natural gas, targets and parameters set by OGRA. Income earned in excess / short of the above guaranteed return is payable to /recoverable from the Government of Pakistan (GoP) and is adjusted from / to the gas development surcharge balance payable to / receivable from the GoP.

#### 3.13 **I**mpairment

### Financial assets

A financial assets is assessed at each reporting date to determine whether there is any objective evidence that it is impaired. A financial asset is considered to be impaired if objective evidence indicates that one or more events have had a negative effect on the estimated future cash flows of that asset.

### Non-financial assets

The carrying amounts of non-financial assets other than inventories and deferred tax assets, are assessed at each reporting date to ascertain whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated. An impairment loss is recognised, as an expense in the unconsolidated profit and loss account, for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. Value in use is ascertained through discounting of the estimated future cash flows using a discount rate that reflects current market assessments of the time value of money and the risks specific to the assets. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

#### 3.14 Staff retirement benefits

The Company operates the following retirement schemes for its employees:

Approved funded pension and gratuity schemes for all employees.

Contributions to the schemes are made on the basis of actuarial valuations under the projected unit credit method.

Actuarial gains / losses are recorded based on actuarial valuation that is carried out annually. Unrecognized actuarial gains and losses, relating to non-executive and executive employees defined benefit plans, exceeding ten percent of the greater of the present value of defined benefit obligations and the fair value of plan assets, are recognized in the unconslidate profit and loss account over the expected average remaining working lives of the employees participating in the plan.

Past service cost is recognised in the unconsolidated profit and loss account as an expense on a straight line basis over the average period until the benefits become vested. To the extent that the benefits are already vested, the expense is recognized immediately in the unconsolidated profit and loss account.

Unfunded free medical and gas supply facility schemes for its executive employees.

Liability under these schemes is recognized in the period in which the benefit is earned based on the actuarial valuations carried out under the projected unit credit method. The medical and free gas supply facilities have been discontinued for employees retiring after 31 December 2000.

Actuarial gains / losses are recorded based on actuarial valuation that is carried out annually.

Unrecognized actuarial gains or losses, exceeding ten percent of the present value of the defined benefit obligation, are recognised in the unconsolidated profit and loss account over the expected average remaining working lives of the employees participating in the plan.

Approved contributory provident funds for all employees (defined contribution scheme).

The Company operates a recognised provident fund for all its employees. Equal contributions are made, both by the Company and the employees, to the fund at the rate of 7.5% of basic salary in the case of executive employees and 8.33% of basic salary and adhoc relief cost of living allowance in the case of non executive employees and the same is charged to the unconsolidated profit and loss account.

A non-contributory benevolent fund, under which only the employees contribute to the fund.

### 3.15 Compensated absences

The liability for accumulated compensated absences of employees is recognized based on actuarial valuation in the period in which employees render services that increase their entitlement to future compensated absences.

### 3.16 Foreign currency translation

Transactions in foreign currencies are translated into Pak rupees at the exchange rates prevailing on the date of transaction. Monetary assets and liabilities in foreign currencies are translated into Pak rupees at the rates of exchange ruling at the unconsolidated balance sheet date. Exchange gains and losses are taken to the unconsolidated profit and loss account currently.

### 3.17 Derivative financial instruments

Derivative financial instruments if any are recognized initially at cost. Subsequent to initial recognition, the derivative financial instruments are stated at fair value. Changes in fair value of derivative financial instruments are recognised in the unconsolidated profit and loss account, along with any changes in the carrying value of the hedged liability. Derivative financial instruments are carried as assets when fair value is positive and as liabilities when fair value is negative.

### 3.18 Fiduciary assets

Assets held in trust or in a fiduciary capacity by the Company, if any, is not treated as assets of the Company and accordingly is disclosed separately.

### 3.19 Off-setting

Financial assets and liabilities are off set and the net amount is reported in the financial statements only when there is a legally enforceable right to set-off the recognized amount and the Company intends either to settle on a net basis, or to realise the assets and to settle the liabilities simultaneously.

### 3.20 Cash and cash equivalents

Cash and cash equivalents are carried in the unconsolidated balance sheet at cost. For the purposes of unconsolidated cash flow statement, cash and cash equivalents comprise cash in hand and deposits in banks, short term running finance under mark-up arrangement, short term liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value.

### 4. ISSUED, SUBSCRIBED AND PAID-UP CAPITAL

	Less: Current portion shown under current			
	liabilities		(7,559)	(7,411)
			948,640	56,199

- 6.4.1 An unsecured development loan from Government of Sindh has been availed for supply of gas to various districts and areas of Sindh. The facility carries mark-up at 2 percent per annum. The loan together with mark-up shall be repaid in 10 yearly instalments with grace period of 2 years commencing from year ended 30 June 2007.
- 6.4.2 An unsecured development loan from Government of Sindh has been availed for supply of gas to various districts and areas of Sindh. The facility carries mark-up at 4 percent per annum. The loan together with mark-up shall be repaid in 10 yearly instalments with grace period of 2 years commencing from year ending 30 June 2011. The loan has been stated at fair value (refer note 6.4.3).
- 6.4.3 This represents the benefit of lower interest rate on Government of Sindh Loan II and is calculated as difference between the proceed received in respect of Government of Sindh Loan II amounting to Rs. 900 million and its initial fair value amounting to Rs. 582.076 million calculated at KIBOR prevailing at year end. This benefit is treated as Government grant and would be amortised over the estimated useful life of related assets when constructed.

### LONG TERM DEPOSITS

Security deposits from:

- gas customers
- gas contractors

7.1 2,916,100 7.2 38,086 2,954,186

2000

2,531,111 47,777 2,578,888

- 7.1 Customer deposits represent gas supply deposits based on an estimate of three months consumption of gas sales to industrial and commercial customers while deposits from domestic customers are based on the rates fixed by the Government of Pakistan. These deposits are repayable / adjustable on disconnection of gas supply. Mark-up at 5 percent per annum is payable by the Company on deposits from the industrial and commercial customers. No mark-up is payable on deposits received from domestic customers.
- 7.2 These represent security deposits received from the contractors. These deposits are free of mark-up and are refundable on the cancellation of contract.

#### **DEFERRED TAX - net** 8.

Deferred tax liability comprises of (deductible) / taxable temporary differences in respect of the following:

2000

- 12.3 This amount was received by the Company from Pak Arab Refinery Limited (PARCO) in accordance with an agreement dated 12 October 1988. It represents consideration for 50 percent share of PARCO in the Indus right bank pipeline common right of way and is the full settlement of PARCO's total liability for its share, irrespective of the final amount of compensation payable to the land owners by the Company. The final liability of the Company has not been estimated, as the amount of compensation due to land owners has not been determined by the Authorities. Accordingly, the amount received from PARCO has been classified as an advance.
- 12.4 This includes Rs. 95.489 million (2008: Rs. 82.016 million) on account of amount payable to disconnected customers for gas supply deposits.

15.2	Commitments for capital and other expenditure		1,051,609	2,932,197
15.3	Guarantees issued on behalf of the Company		4,630	16,450

- 15.4 Demand finance facilities have been given to the Company's employees by certain banks for the purchase of vehicles against the Company's guarantee and hypothecation of Company's stock of pipes, gas meters, regulators, etc. valuing Rs. 75 million (2008: Rs. 75 million) and Company's investment in shares having a face value of Rs. 0.5 million (2008: Rs. 0.5 million). Loan outstanding at the year end was Rs. 16.797 million (2008: Rs. 17.800 million).
- 15.5 Jamshoro Power Company Limited (JPCL) (formerly WAPDA) has lodged a claim against the Company amounting to Rs. 381.374 million (2008: Rs. 381.374 million) for short supply of gas under the provisions of an agreement dated 10 April 1995 between the Company and JPCL. The Company has not accepted the claim and has filed a counter claim due to JPCL failure to uplift minimum quantities during certain other periods. Provision against this liability has not been made as the Company is confident that ultimately the resolution of the claim lodged would be in its favour.
- 15.6 JPCL has also raised a claim of Rs. 5.793 million (2008: Rs. 5.793 million) for the alleged low Gas Chlorofic Value (GCV) measurement for the period from January 2002 to December 2002 and February 2003 as compared to the actual GCV billed by the Company. Provision against this liability has not been made as the Company is confident that ultimately the resolution of the claim would be in its favour.
- The Company is in litigation against certain temporary assignees who were relieved in the previous years. The Federal Services Tribunal (FST) had initially ordered the Company to absorb these assignees. The Company preferred to file an Appeal before the Honourable Supreme Court of Pakistan against the orders of the FST, which was dismissed by the Honourable Supreme Court. The Company then filed two Review Petitions before the Honourable Supreme Court against the rejection of the Company's Appeal. In addition the Federation of Pakistan has also filed four Civil Miscellaneous Applications (CMAs) and three Review Petitions against the said order.

During an interim hearings held in May 2007 and September 2007 Honourable Supreme Court ordered the Company to absorb 109 and 551 individuals respectively which was complied with by the Company. Supreme Court further ordered that the pending CMAs and Review Petitions pertaining to the issue filed by the Company, Federation of Pakistan and Temporary Assignees will be kept for hearing at any date fixed by Supreme Court.

Further, President of Pakistan on 14 February 2009 promulgated the Sacked Employees (Reinstatement) Ordinance 2009, ("the Ordinance") for providing relief to persons who were appointed during the period from 1 November 1993 to 30 November 1996 (both days inclusive) and ere dismissed, removed or terminated or given forced golden hand shake from service during 1 November 1996 to 31 December 1998 (both days inclusive). Under the requirements of the rdinance, total number of employees to be reinstated was determined at 2,994 employees. Out of hese employees reinstatement letters were issued to 2,496 employees with the condition that their remunerations and back benefits will be paid to them on receipt of funds from Government of Pakistan (GoP). 2,435 employees have joined the Company up to 30 June 2009. During the year, Rs. 108 million was received from GoP. Out of which, Rs. 49 million has been paid to employees and remaining amount are being paid. However, no provision has been made against current salaries costs and back benefits payable to reinstated employees amounting to Rs. 185.210 million and Rs. 2,345.679 million respectively as the management is of the view that as per negotiations with the Sub-committee established by the Cabinet Division – GoP, the same would be payable when the funds are received from Government of Pakistan.

- 15.8 In previous year, Income Tax Appellate Tribunal (ITAT) had decided an Appeal in favour of Income Tax Department on the issue of capital gain made on disposal of LPG business in the financial year 2001 resulting in tax impact of Rs. 143 million. Management has filed an Appeal before Honourable High Court in which the Company's management is of the view that sale of LPG business being in nature of "slump transaction" was not chargeable to tax under Rule 7 and 8 of the 2nd Schedule of the Income Tax Ordinance, 1979. Accordingly, no provision regarding the said claim has been made in these financial statements as the Company based on its legal advisor's opinion is confident that the matter would be resolved in favour of the Company.
- 15.9 The tax audit proceedings have been initiated by the tax department in respect of Tax Year 2005 under section 177 of the Income Tax Ordinance, 2001. The management of the Company is confident that no further tax liability would arise in this respect.
- 15.10 The Sales tax Authorities issued a notice to the Company in 2006 requiring it to pay sales tax on the transportation charges on sale of gas condensate and recovery of insurance premium in respect of such transportation amounting to Rs. 6.111 million. The Company filed an Appeal before Customs, Sales Tax and Federal Excise (Appellate) Tribunal on the basis of Company's contention that both of these items does not fall in the definition of Supply under Sales tax Act 1990. This Appeal was dismissed by the Appellate Tribunal. The Company has filed second appeal before Honourable Sindh High Court in this regard. No provision has been made in these financial statements in this regard as Company based on its tax advisor's opinion is confident that the decision of the Appeal will be in its favour.
- 15.11 The Additional Collector (Adjudication) Sales Tax and Federal Excise passed an order against the Company with a demand of Rs. 311.397 million in respect of sales tax on disposal of fixed assets, incorrect adjustment against exempt supplies, non payment of sales tax on transportation charges, late payment surcharge and service connection charges along with default surcharge and penalty at the rate of 5% of the total amount of tax involved. The Company has paid sales tax on these balances in order to avail amnesty / exemption from additional sales tax. However the Company has filed an Appeal before the Appelate Tribunal (Customs, Excise & Sales Tax) and based on its tax advisor's opinion is confident that the decision of the Appeal will be in its favour.
- 15.12 During the year, the Additional Collector (Adjudication) Sales Tax and Federal Excise passed an order making the input tax adjustments inadmissible in respect of exempt supplies made to Agha Khan University. The resulting alleged liability is Rs. 16.278 million. In the same order the Additional Collector (Adjudication) held the Company responsible for not depositing the amount of sale tax withheld under SRO 660(1)/2007 as withholding agent. The alleged liability is of Rs. 1,248.322 million along with default surcharge (to be calculated at the time of final payment). The Company has filled an Appeal against the said order before the Appellate Tribunal (Customs, Excise& Sales Tax ) Karachi. No provision has been made in these financial statements as the Company based on its tax advisor's opinion is confident that the decision of the Appeal will be in its favour.
- 15.13 During the year Deputy Collector ( Processing and Assessment ) has issued recovery notice to the Company with a demand of Rs. 859.211 million along with default surcharge (to be calculated at the time of final payment) on the ground that Company has collected 25 % sales tax on sales of natural gas to CNG stations including 9 % in lieu of value addition made by CNG stations, which has been included as output tax in the monthly sales tax returns and failed to deposit the same 9%. The Company has filed "Constitution Petition" before Honourable High Court. The Company based on its tax advisor's opinion is confident that the decision of the recovery notice will be in its favour.
- 15.14 During the year Additional Collector (Adjudication) has issued Show Cause Notice to the Company requiring it to pay federal excise duty @ 5 % amounting to Rs. 170 million along with default surcharge (to be calculated at the time of final payment) on the amount of royalty charged from JJVL .The Holding Company has replied against the said notice through its tax advisor. No response from Additional Collector has been received to date. The Holding Company based on its tax advisor's opinion is confident that no further action would be taken by Additional Collector, hence no provision has been made in these financial statements.
- 15.15 The management is confident that ultimately these claims (note 15.1) would not be payable.

Trovision against impaned inventory	298,658	371,316

### 23. CUSTOMERS' INSTALLATION WORK IN PROGRESS - at cost

This represents cost of work carried out by the Company on behalf of the consumers at their premises. Upon completion of work, the cost thereof is transferred to transmission and distribution cost and recoveries from such consumers are shown as deduction there from as reflected in note 31 to these financial statements.

### 24. TRADE DEBTS

22.

Considered good - secured - unsecured	24.1	6,909,685 25,658,520 32,568,205	5,408,402 14,636,626 20,045,028
Considered doubtful		2,163,753 34,731,958	1,701,493 21,746,521
Provision against impaired debts	24.2	(2,163,753)	(1,701,493)

24.1 Trade debts include receivables from Karachi Electric Supply Company Limited (KESC), Jamshoro Power Company Limited (JPCL) and Sui Northern Gas Pipelines Limited (SNGPL) have aggregated to Rs. 29,077 million as at 30 June 2009 (2008: Rs. 12,526 million), which includes overdue amounts of Rs. 17,491 million (2008: Rs. 5,894 million). Receivable from SNGPL against uniform cost of gas and lease rental is stated under other receivables and amounts to Rs. 7,940 million (2008: Rs. 3,214 million) (refer note no. 28.2), which includes overdue uniform cost of gas invoices of Rs. 2,468 million (2008: Rs. 1,455 million). Interest accrued amounting to Rs. 1,167 million (2008: Rs. 185.073) in respect of overdue balances of KESC, JPCL and SNGPL is stated in accrued interest (refer note 27).

During the year, Company received a total of Rs. 9,300 million from SNGPL, WAPDA and Government of Pakistan (on behalf of KESC) under inter circular corporate debt settlement arrangements. This amount was paid by company to Oil and Gas Development Company Limited (OGDCL) as agreed under the arrangements. As at 30 June 2009, amounts of Rs. 27,090 million (included in creditors for gas in note 12) is payable to OGDCL, Pakistan Petroleum Limited and Government Holding (Private) Limited in respect of gas purchases along with interest of Rs. 3,867 million on their balances. In view of the arrangements being made by the committee to adjust intercorporate circular debt of the Government entities and KESC, the management is confident that the entire amount receivable from KESC, JPCL and SNGPL would be recovered / adjusted.

### 24.2 Movement of provision against impaired debts

2009 2008 Note (Rupees in '000)

Balance as at 1 July Provision for the year

1,701,493 1.544.639 156,854 462,260 1,701,493 2,163,753

24.3 Up to 30 June 2008, the live domestic consumers who have been allowed to pay their outstanding balances in instalments had been considered to determine the provision against doubt full trade debts. During the year ended 30 June 2009, the Company has decided not to consider balances of such consumers in estimation of provision against doubt full trade debts as these are live customers. Accordingly, provision for doubt full trade debts has been estimated without considering balances of such consumers. Had the basis used to estimate the provision not been changed the provision against doubtful live domestic consumers would have been higher and profit for the year and equity would have been lower by Rs. 203.379 million.

### 25. LOANS AND ADVANCES - considered good

Current portion of long term loans:

20 3,101 2,887 - executives - other employees 20 26,947 27,698 30,048 30,585 Advances to: 25.1 7,251 4,442 - executives - other employees 56,281 80,963 63,532 85,405

25.1 The maximum aggregate amount of advances due from executives at the end of any month during the year was Rs.28.489 million (2008: Rs. 13.956 million).

### TRADE DEPOSITS AND SHORT TERM PREPAYMENTS

Advances for goods and services - unsecured, considered good Trade deposits - unsecured, considered good Prepayments

- 30.1 Under section 21 of the Oil and Gas Regulatory Authority Ordinance, 2002, the Government of Pakistan has issued a policy guideline to ensure the uniformity of gas prices for consumers throughout the country. Accordingly, under this policy guideline and pursuant to an agreement between the Company and Sui Northern Gas Pipelines Limited effective from 1 July 2003, the cost of gas purchased is being worked out by both the companies on an overall average basis in such a manner that input of gas for both companies become uniform. Under this agreement, the Company with lower weighted average cost of gas is required to pay to the other company so that the overall weighted average rate of well head gas price of both the companies is the same. However, this averaging has not affected the unconsolidated profit and loss account of the Company as in the absence of averaging, the corresponding effect would have been to gas development surcharge account in the unconsolidated profit and loss account.
- 30.2 The net volume difference of gas purchase and sales after adjusting internal consumption in the Company's operations is termed as Unaccounted for Gas ("UFG"). Among other disallowances made by OGRA the excess UFG is added to gas development surcharge by reducing the profit. Actual UFG for the year ended 30 June 2009 was 7.93% (2008: 6.63%) against the targets fixed by OGRA at 4.8% (2008: 5.55%). In financial terms this has caused disallowances of Rs. 2,817.832 million (2008: 762 million) which has been added to gas development surcharge and reduced from profit. Region wise break-up of UFG is as follows:

	2009		2008	
	Volume in MMCF *	%	Volume (MMCF)	%
Karachi Sindh (excluding Karachi) Balochistan Transmission loss / (gain)	14,806 9,748 9,419 (472)	4.88 11.19 33.97 (0.11)	11,013 7,350 7,626 1,105	3.82 8.21 29.73 0.27

Sales meter station (SMS) wise break-up the UFG of the Company for the year ended 30 June 2009 is as follows:

- others	36.1	23,691_	2,193
		4,409,792	2,370,674

This includes Rs. 22.744 million (30 June 2008: Nil) in respect of fee for loan obtained during the year. 36.1

#### 37. **TAXATION**

Current	-	415,492
Deferred	159,210	866,564
Prior years - deferred		108,504
	159,210	1,390,560

37.1 Relationship between unconsolidated accounting profit and tax expense for the year is as follows:

	2009 (Rup	2008 ees in '000)
Accounting profit for the year	416,695	2,381,627
Tax rate	35%	35%
Tax charge @ 35% (2006: 35%) Minimum tax @ 0.5% Tax effect of expenses that are not deductible in determining taxable profit Effect of lower tax rate on dividend income	145,844 - 13,004 -	833,569 415,492 33,937 (1,627)
Prior years' tax charge Effect of adjustment in opening written down value Others	362 159,210	108,504 685 - 1,390,560

37.2 Due to tax losses, the Company has charged / paid minimum tax under section 113 of Income Tax Ordinance, 2001 for year ended 30 June 2005 to 30 June 2008 amounting to Rs. 990 million. The minimum tax has been expensed by the Company. Under provisions of section 113 of Income Tax Ordinance, 2001, the minimum tax so paid may be adjusted against future taxable profits.

## 38. STAFF RETIREMENT BENEFITS

#### 38.1 Funded post retirement pension and gratuity schemes

As mentioned in note 3.14 to these financial statements, the Company operates approved funded pension and gratuity schemes for all employees. Contributions are made to these schemes based on actuarial recommendations. Latest actuarial valuations were carried out as at 30 June 2009 under the projected unit credit method for both non-executive and executive staff members.

## Fair value of plan assets and present value of obligations

The fair value of plan assets and present value of defined benefit obligations of the pension and gratuity schemes at the valuation date were as follows:

	2009			
	Ex	Executives		-executives
	Pension	Gratuity	Pension	Gratuity
(Asset) / liability in unconsolidated balance sheet		———(Rup	ees in '000)———

#### 44. FINANCIAL RISK MANAGEMENT

The objective of Company's overall financial risk management is to minimize earnings volatility and provide maximum return to shareholders. The Board of Directors of the Company has overall responsibility for the establishment and oversight of the Company's risk management framework and policies.

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

#### 44.1 Credit risk

Credit risk is the risk that one party to a financial instruments will fail to discharge an obligation and cause the other party to incur a financial loss, without taking into account the fair value of any collateral. Credit risk arises from trade debts, net investment in finance lease, loans and advances, deposits, bank balances, interest accrued and other receivables. To reduce the exposure toward the credit risk, comprehensive consumer category wise credit limits and terms have been established. In case of industrial and commercial consumers gas supply deposits equivalent of three months estimated gas consumption and deposit from domestic consumers as per rates notified by OGRA are taken to reduce credit exposure. The Company continuously monitors the credit given to the consumers and interest accrued thereon and has established a dedicated recovery department for follow-up of consumer for recovery and disconnection of gas supply in case of defaulted consumers. Loans and advances given to employees are secured against retirement benefits of the employees and title deed of properties of employees. Bank balances are maintained with sound credit rating banks. The Company attempts to control credit risk in respect of other receivables by monitoring credit exposures of counter parties.

The maximum exposure to credit risk before any credit enhancement at year end is the carrying amount of the financial assets as set out below:

2000

2000

	2009	2006	
	(Rupees in '000)		
Trade debts	32,568,205	20,045,028	
Net investment in finance lease	1,278,132	1,392,776	
Loans and advances	205,359	227,336	
Deposits	26,158	112,437	
Bank balances	1,460,873	4,338,015	
Interest accrued	1,198,062	198,326	
Other receivables	8,511,523	3,956,092	
	45,248,312	30,270,010	

## 44.1.1 Collateral and other credit enhancements obtained

Security against supply of gas to industrial and commercial customers is taken on the basis of average three months gas consumption estimated at the time of connection in form of cash deposits (gas supply deposits) / bank guarantee / irrevocable letter of credit. Security against supply of gas to domestic consumers are obtained at rates notified by OGRA. These collaterals are adjusted / called upon disconnection of gas supply. Carrying amount of security held at year end is as follows:

Cash Deposits	2,916,100	2,531,111
Bank Guarantee	9,238,130	8,772,175
Total	12,154,230	11,303,286

## 44.1.2 Credit Quality

The Company monitors the credit quality of its financial assets with reference to historical performance of such assets and where available external credit ratings. The carrying values of all financial assets which are neither past due nor impaired are given in the note 44.1.3 below:

The credit quality of the Company's major bank accounts is assessed with reference to external credit ratings which are as follows:

Bank	Rating Agency	Rating	
		Short Term	Long Term
National Bank of Pakistan Limited	JCR-VIS	A1+	AAA
Allied Bank of Pakistan Limited	PACRA	A1+	AA
Bank Alfalah Limited	PACRA	A1+	AA

Bank of Punjab Limited	PACRA	A1+	AA-
My Bank Limited	PACRA	A2	A <del>-</del>

# 44.1.3 Past due and impaired financial assets

## Industrial and commercial consumers

The age analysis of trade debt balances relating to industrial and commercial consumers at year end is as follows:

	2009			
	Gross carrying amount	Impairment	Collateral	Impairment net of collateral
		(Rup	ees in '000)———	
Not due balances Past due and impaired Disconnected Consumers	13,159,376 17,164,778 241,015	230,066 241,015	10,741,495 351,682 -	230,066 241,015
Total	30,565,169	471,081	11,093,177	471,081
	2008			
	Gross carrying amount	Impairment	Collateral	Impairment net of collateral
		(Rup	ees in '000) <del></del>	
Not due balances Past due and impaired Disconnected Consumers	11,016,513 7,016,582 200,868	- - 200,870	10,003,380 342,770 -	- - 200,870
Total	18,233,963	200,870	10,346,150	200,870

Past due balances include aggregate over due balances of KESC and JPCL amounting to Rs. 15,023 million and are subject to inter corporate circular debt of government entities and KESC. (refer note No. 24.1)

The Company maintains collateral / security against industrial and commercial consumers and replenish such collateral based on gas consumption and requirement of the consumers. When recovery is not made within one month, such consumers balances are generally considered past due. In case of past due balances the Company starts recovery process through recovery department and where the amount is in excess of collateral and is not recovered by recovery department, then disconnection of meter (disconnected consumers) are considered. Receivables which are past due and against which recoveries are not made or which are disconnected are considered as impaired assets.

## Domestic consumers

The age analysis of trade debt balances relating to industrial and commercial consumers at year end is as follows:

			2009	
	Gross carrying amount	Impairment	Collateral	Impairment net of collateral
		———(Rupe	ees in '000)———

Based on the past experience, consideration of financial position, past track records and recoveries, the provision against past due but not impaired domestic consumers is made based on the study carried out by an independent management consultant.

As explained in note 24.3 to these financial statements, from current year the Company has decided not to consider balances of consumers who have been allowed to pay their outstanding balances in instalments in estimation of provision against doubtful trade debts. During the period 108,815 consumers (balances amounting to Rs. 523.123 million) renegotiated terms of payment in respect of their past due balances on instalment basis and respectively were considered good.

#### Interest Accrued

As at 30 June 2009 interest accrued was Rs. 1,198.062 million (2008: Rs.198.326 million). Interest accrued mainly on consumers' balances past due / over due balances. Interest past due balances of Rs. 738.315 million includes aggregate over due balances of KESC, WAPDA and SNGPL amounting to Rs. 738.03 million (2008: Nil), recovery of which is subject to inter corporate circular debt of government entities and KESC. (refer note No.24.1)

#### Other receivables

As at 30 June 2009 other receivable financial assets amounted to Rs. 8,511.523 million (2008:Rs.3,956.092 million). Past due other receivables amounting to Rs. 2,826.155 million (2008: Rs. 460.150 million) include over due balances of SNGPL amounting to Rs. 2,468 million (2008: Rs. Nil), recovery of which is subject to inter corporate circular debt of government entities and KESC. (refer note No.24.1)

#### 44.1.4 Concentration of credit risk

Concentration of credit risk arises when a number of counter parties are engaged in similar business activities or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economics, political or other conditions. Concentrations of credit risk indicate the relative sensitivity of the Company's performance to developments affecting a particular industry. Concentration of credit risk is determined with references to the individual consumers / counter parties, type as well as geographical distribution of consumers / counterparties. Concentration of credit risk in financial assets of the Company is as follow:

#### Trade debts

Consumer category wise concentration of credit risk in respect of trade debt at year end is as follows:

Rupees in '000    Power Generation Companies   21,633,539   12,245,506     Cement Industries   174,592   201,884     Fertilizer and Steel Industries   1,873,442   570,644     Other Industries   5,817,461   4,488,207     Total industrial customers   29,499,034   17,506,241     Commercial customers   595,054   526,852     Domestic consumers   2,474,117   2,011,935     32,568,205   20,045,028		2009	2008

		32,568,205	20,045,028

At year end the Company's most significant customers were KESC and WAPDA which amounted to Rs. 15,594 million (2008: 7,709 million) and Rs. 5,543 million (2008: 4,351 million) respectively. These balances have aggregated due to inter circular corporate debt arrangement. (Refer note 24.1 to these financial statements).

Geographical region wise concentration of credit risk in respect of trade debt at year end is as follows:

	2009	2008
	(Rupees in '000)	
:	24,100,514 7,042,626 1,425,065	13,646,119 5,876,090 522,819
3	32,568,205	20,045,028

Karachi Sindh (excluding Karachi) Balochistan

#### Net investment in finance lease

The Company's most significant investment in finance lease amounted to Rs. 887.556 million (2008: Rs. 948.663 million) in respect of SNGPL.

#### Interest accrued

Most significant counter parties of the Company in respect of interest accrued are disclosed in note 27 to these financial statements.

#### Other receivables

Most significant other receivables of the Company are in respect of lease rental, lease service cost, contingent rent and uniform cost of gas agreement with SNGPL as disclosed in note 28.2 to these financial statements. These balances are subject to inter circular corporate debt arrangement as explained in note 24.1 to these financial statements.

#### 44.2 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations as they fall due. Liquidity risk arises because of the possibility that the Company could be required to pay its liabilities earlier than expected or difficulty in raising funds to meet commitments associated with financial liabilities as they fall due. The Company's approach to manage liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. Due to nature of the business, the Company maintains flexibility in funding by maintaining committed credit lines available. The Company's liquidity management involves projecting cash flows and considering the level of liquid assets necessary to fulfil its obligation; monitoring balance sheet liquidity ratios against internal and external requirements and maintaining debt financing plans.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the balance sheet date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows.

		2009				
	Carrying Amount	Contractual cash flows	Not later than six months	Later than six months but not later than 1 year	later than one year but not later than 2 years	later than 2 years
			(Rupees	in '000)		
Long term loans	22,466,265	(28,120,852)	(2,451,821)	(5,210,948)	(9,320,988)	(11,137,095)
Trade and other payables	47,241,936	(47,241,936)	(47,241,936)	-	-	-
Interest and mark-up accrued	4,181,967	(4,181,967)	(4,181,967)	-	-	-
Long term deposit	2,954,186 76,844,354	(6,729,811)	(65,530)	(5,210,948)	(92,752)	(6,571,529) (17,708,624)

	2008					
	Carrying Amount	Contractual cash flows	Not later than six months	Later than six months but not later than 1 year	later than one year but not later than 2 years	later than 2 years
		(Rupees in '000) ————				
Long term loans	15,959,130	(21,663,362)	(1,255,045)	(1,328,217)	(7,017,978)	(12,062,122)
Trade and other payables	27,574,298	(32,738,780)	(32,738,780)	-	-	-
Interest and mark-up accrued	2,038,106	(2,038,106)	(2,038,106)	-	-	-
Long term Deposit	<u>2,578,888</u> 48,150,422	(5,726,838) (62,167,086)	(73,558) (36,105,489)	<u>-</u> (1,328,217)	<u>(78,699)</u> <u>(7,096,677)</u>	(5,574,581) (17,636,703)

The contractual cash flows relating to the above financial liabilities have been determined on the basis of mark-up rates effective as at 30 June. The rates of mark-up have been disclosed in notes 6 and 7 to these financial statements. Contractual cash flows of the long term deposits are determined on the assumption that adjusted / refund of these deposits will not be required before expiry of 40 years from balance sheet date.

#### 44.3 Market risk

Market risk is the risk that the value of the financial instrument may fluctuate as a result of changes in market interest rates or the market price due to a change in credit rating of the issuer or the instrument, change in market sentiments, speculative activities, supply and demand of securities and liquidity in the market. The Company is exposed to currency risk, interest rate risk and other price risk (equity price risk).

#### 44.3.1 Currency risk

Foreign currency risk is the risk that the value of financial asset or a liability will fluctuate due to a change in foreign exchange rates. It arises mainly where receivables and payables exist due to transactions entered into foreign currencies.

The Company is exposed to currency risk on creditors for gas that are denominated in a currency other than the respective functional currency of the Company. The currency in which these transactions primarily are denominated is US Dollars. The Company's exposure to foreign currency risk is as follows:

, , ,	,	2009			
		Rupees in 000	US Dollars in '000	Pound Sterling in '000	Euro in '000
Creditors for gas		9,562,831	117,236		
Gross balance sheet exposure		9,562,831	117,236	-	-
Estimated forecast gas purchases Estimated forecast purchases		126,172,231	1,546,797	-	-
of stores and supplies		492,596	802	285	3,375
Gross exposure		136,227,658	1,664,835	285	3,375
			2008		
	Rupees in 000	US Dollars in '000	Pound Sterling in '000	Euro in '000	Japanese Yen in '000
Creditors for gas	7,488,760	109,531	-	-	-
Gross balance sheet exposure	7,488,760	109,531	-	-	-
Estimated forecast gas purchases	85,507,829	1,250,663	-	-	-
Estimated forecast purchases					
of stores and supplies	1,239,567	11,118	713	3,279	43,872
Gross exposure	94,236,156	1,371,312		3,279	43,872

Above net exposure is payable by the Company in Rupees at the rate on which these are settled by the Company. Currently,

the Company does not obtain forward cover against the gross exposure as exchange loss/ gain on purchases of gas and supplies is recovered from / paid to Government of Pakistan as part of guaranteed return. (refer note 47.7)

The following significant exchange rates applied during the year:

	Average rate		Bal	Balance sheet date rate	
	2009	2008	3 2009	2008	
		Rupees		Rupees	
US Dollars	80.33	64.9	2 81.57	68.37	

## Sensitivity analysis

A ten percent strengthening / (weakening) of the Rupee against US Dollar at 30 June 2009 would have increased / (decreased) trade creditors and gas development surcharge receivable from Government of Pakistan by Rs. 956.404 million (2008: Rs.748.876 million). There is no effect of strengthening / (weakening) of US dollar on unconsolidated equity and unconsolidated profit and loss account of the Company as exchange loss/gain on purchases of gas and store and supplies is recovered from / paid to Government of Pakistan as part of 17% guaranteed return. This analysis assumes that all other variables, in particular interest rates, remain constant. The analysis is performed on the same basis for 2008.

#### 44.3.2 Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Majority of the interest rate exposure arises from short and long term borrowings from banks. At the balance sheet date the interest rate profile of the Company's interest-bearing financial instruments were as follows:

	2009	2008	
Fixed rate instruments	(Rupees in '000)		
Financial assets			
Net investment in finance lease Loan and Advances Cash and bank balances Trade debts	1,278,132 10,847 680,118 12,771,701	1,392,776 19,116 4,113,268 3,519,346	
Financial liabilities Long term deposits Govt. of Sindh Loan Variable rate instruments	1,855,047 956,199	1,573,975 63,610	
Financial Assets			
Other receivables Trade debts	2,662,460 4,393,077	485,810 3,497,236	
Financial liabilities			
Trade and other payables Long Term Loan except Govt. of Sindh Loan	18,270,804 21,510,066	6,477,282 15,895,519	

Fixed rate instrument bear fixed interest rate while all other borrowings bear variable interest rate and are indexed to KIBOR. Borrowing is generally determined on the basis of business needs. The Company analysis its interest rate exposure on a regular basis by monitoring existing facilities against prevailing market interest rates and taking into account various other financing options available.

## Fair value sensitivity analysis for fixed rate instruments

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit and loss. Therefore, a change in interest rates at the reporting date would not affect unconsolidated profit and loss account and the unconsolidated equity of the Company.

## Cash flow sensitivity analysis for variable rate instruments

A change of 100 basis points in interest rates at the reporting date would have net increased or (net decreased) the unconsolidated profit or loss of the Company as at 30 June 2009 by Rs. 76.704 million (2008: Rs. 17.426 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2008.

## 44.3.3 Equity price risk

Equity price risk is the risk of changes in the fair value of equity securities as the result of changes in the levels of KSE-100 Index and the value of individual shares. The equity price risk exposure arises from the Company's investments in listed equity securities. This arises from investments held by the Company for which prices in the future are uncertain. The fair value of listed equity investments of the Company that are exposed to price risk as at 30 June 2009 is Rs. 102.341 million (2008: Rs. 152.394 million)

A 10% increase/ decrease in the prices of listed equity securities of the Company at the reporting date would have increased or (decreased) long term investment and unconsolidated equity by Rs. 10.234 million (2008: Rs. 15.239 million). This analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2008.

#### 44.4 Fair value of financial assets and liabilities

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction. Consequently differences can arise between carrying values and the fair value estimates.

The carrying values of all financial instruments reflected in the financial statements approximate their fair values except for investment in unquoted companies which are reflected at cost less impairment losses.

#### 45. CAPITAL RISK MANAGEMENT

The objective of the Company when managing capital is to safeguard its ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and to maintain a strong capital base to support the sustained development of its businesses.

The Company manages its capital structure by monitoring return on net assets and makes adjustments to it in the light of changes in economic conditions. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend paid to the shareholders or issue new shares.

The Company is not subject to externally imposed regulatory capital requirements.

#### 46. DETAILS OF INVESTMENTS BY EMPLOYEES

#### **RETIREMENT BENEFIT FUNDS**

Details of the value of investments by the Provident, Gratuity and Pension funds based on respective financial statements at 30 June 2009 and 2008, are as follows:

	2009	2008
	(Rupee Based on un-audited financial statements	s in '000)
Pension fund - executives	562,488	512,070
Gratuity fund - executives	1,151,150	847,508
Pension fund - non executives	417,693	396,600
Gratuity fund - non executives	1,420,410	976,405
Provident fund - executives	1,317,291	1,163,379
Provident fund - non executives	1,655,984	1,392,834
Benevolent fund - executives	58,550	45,391

0000

#### 47. ACCOUNTING ESTIMATES AND JUDGMENTS

#### 47.1 Income tax

The Company takes into account the current income tax law and decisions taken by appellate authorities. Instances where the Company's view differs from the view taken by the income tax department at the assessment stage and where the Company considers that its view on items of material nature is in accordance with law, the amounts are shown as contingent liabilities.

#### 47.2 Staff retirement Benefits

Certain actuarial assumptions have been adopted as disclosed in note 38.1 to the financial statements for valuation of present value of defined benefit obligations and fair value of plan assets. Any changes in these assumptions in future years might affect unrecognized gains and losses in those years.

#### 47.3 Property, plant and equipment

In accordance with the accounting policy, the management carries out an annual assessment of depreciable amount and useful lives of fixed assets. Further, the Company reviews the value of the assets for possible impairment on an annual basis. Any change in the estimates in future years might affect the carrying amounts of the respective items of property, plant and equipment with a corresponding affect on the depreciation charge and impairment.

#### 47.4 Trade debtors

The Company reviews its receivable against provision required there against on a ongoing basis, and appropriate provision is made against outstanding receivable based on systematic basis as approved by the Board of Directors.

#### 47.5 Provision for impaired inventory

The management continuously reviews its inventory for existence of any items which may have become obsolete. The estimates against slow moving and obsolete items are made based on systématic basis as approved by the Board of Directors.

#### 47.6 Fair value of investment

Management has determined fair value of certain investments by using quotations from active market conditions and information about the financial instruments. These estimates are subjective in nature and involve some uncertainties and matters of judgment (e.g. valuation, interest rate, etc.) and therefore, cannot be determined with precision.

#### 47.7 17% guaranteed return

As per license given by OGRA, the Company is required to earn a minimum annual return before taxation of 17% per annum of the net average operating fixed assets (net of deferred credit) for the year, excluding financial and other non-operating charges and non-operating income. The determination of annual return is reviewed and approved by OGRA under the terms of the license and parameters set by OGRA. Amount in excess or short of the guaranteed return is adjusted with the gas development surcharge balance payable to / receivable from the GoP. Disallowances by OGRA are recorded as expenses in the financial statements to which such disallowances are related. Based on OGRA's decision the Company evaluates the nature and reasons of disallowances and where it considers that such amounts should not have been disallowed and additional information / documentation is available, the matter is taken up with OGRA. In case subsequently the amount is allowed by OGRA the allowance is recorded in the period in which it is allowed. Resultantly the profit for the year may be less than the required annual return determined at 17% per annum based on formula stated above.

#### 48. NON ADJUSTING EVENTS AFTER BALANCE SHEET DATE

The Board of Directors have proposed a final dividend for the year ended 30 June 2009 of Rs.Nil per share (2008: Rs.1.25 per share), amounting to Rs. Nil (2008: Rs. 838.968 million) at their meeting held on 29 September 2009, for approval of the members at the annual general meeting to be held on 30 October 2009.

#### 49. **GENERAL**

#### 49.1 Figures have been rounded off to the nearest thousand rupees unless otherwise stated.

#### 50. DATE OF AUTHORISATION

These financial statements were authorised for issue in Board of Directors meeting held on 29 September 2009.
